Deconstructing Scientific Studies				
Read the article and watch the documentary "The Stan deconstructiong the study into its components.	ford Prison Experiment,"			
Problem: What were they testing? Why did they want to study it?				
To investigate how readily people will conform to the rein a role-playing exercise that simulated prison life. Zin whether the brutality reported among guards in Americandistic personalities of the guards.	ples of guards and prisoners nbardo wanted to find out			
Their hypothesis: Write an if/then statement.				
If average people are put into a prison setting, then the	ose assigned the roles of			
guards will				
Experiment design: (What did they do to test their hypothesis? What were the volunteers told? How did they select who would be guards and who would be prisoners?				
Note: What harmonad?				
Data: What happened?				

Findings/Conclusions: What was learned by the study?			
Final Reflection Are the findings credible (believable)? Why or why not? Apply the findings to the real world: What does this experiment tell us about human behavior in a social context, including prison? Based on this experiment, do you believe people are basically good or bad? Write a well-organized reflection that addresses these questions and also explains why this topic is important. Be sure your response includes: • A topic sentence/claim • Supporting details/evidence • Analysis of your evidence • A conclusion that explains why this topic is important
