H A N M A S T A C K *II*

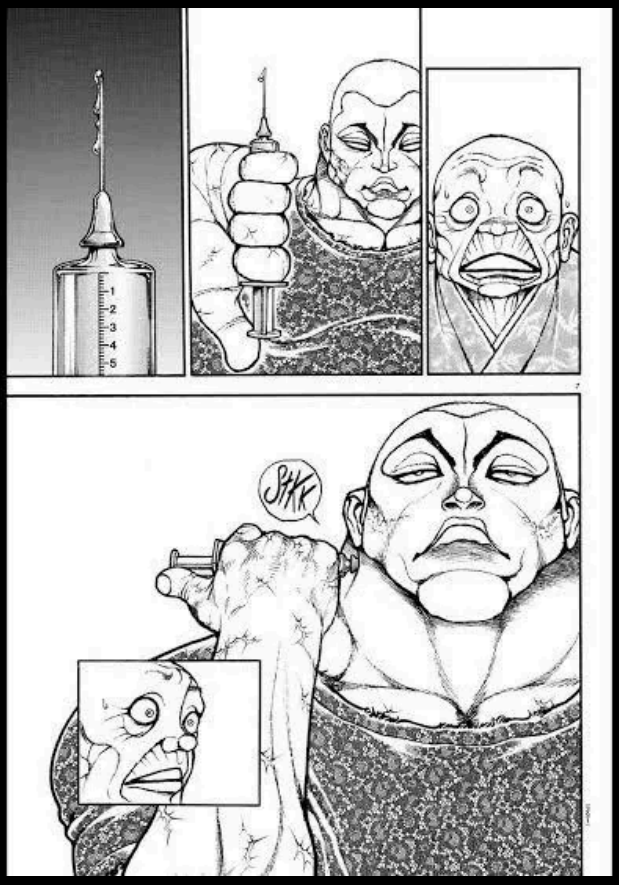

Abundant COL2A1 expression in all joints

Constant type II collagen production

SOX9 upregulation in all growth plates

- Constant and truly unlimited chondrogenesis 24/7
- Abundance of premature chondrocytes for height growth at all times
- Constant chondrocyte multiplication in proliferative zones

SOX8 and SOX9-Derived Peptide injections every night

Memories of SOX9-Derived Peptide therapy every night for DECADES

Proliferative zones constantly stacked with endless chondrocytes

Complete FGFR3 deactivation in all long bones

Heightened GAD2 expression

- Glutamate → GABA conversion consequentially enhanced
- GABAergic flow enhanced for steady and relaxed growth

Always be hyper responsive to peptides and gene therapy

Genetic biokinesis booster

Virtual 200mcg Hexarelin injection every morning

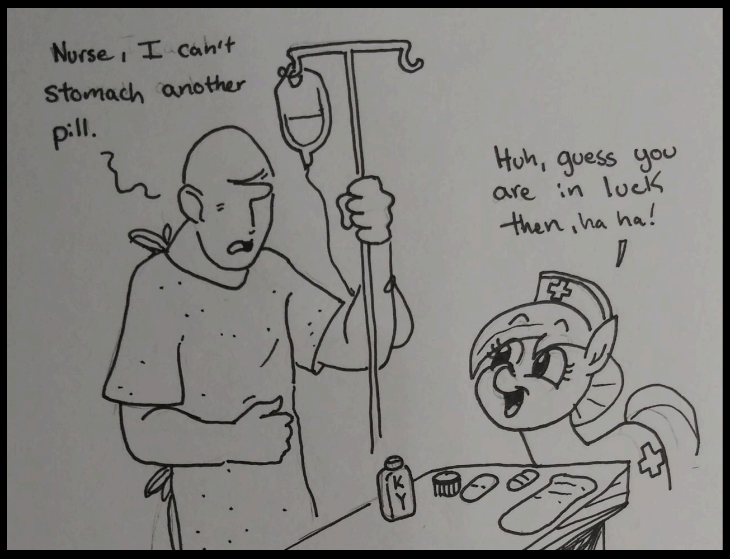

Memories of 200mcg Hexarelin injection every morning for years

Total PI3K pathway activation in all long bones

Total chondrocyte proliferation and bone elongation

Virtual 800mcg GHRP-2 injections 9x a day

Memories of 800mcg GHRP-2 injection 9x a day

15x HGH spikes several times throughout the day

Virtual 37mg CJC-1295 DAC injections every week

Memories of 37mg CJC-1295 DAC injection once a week for years

Baseline HGH levels permanently raised by over 17 fold

Baseline IGF-1 permanently raised by over 8 fold

MP31 micropeptide cycled for years to permanently inhibit GSK3b

- (this peptide also prevents Alzheimer's and enhances cognitive function btw)

Lithium allocated to all long bones

GSK3 beta and alpha expression individually deactivated in all bones and vertebrae

Unlimited epi/genetic growth potential for every single bone and vertebrae
