AquaRoots is an agricultural tech venture that aims to redefine farming in Togo by introducing a new farming model centered around aquaponic systems that will increase farming productivity, crop yields, and nutritional diversity in vulnerable Togolese communities. AquaRoots does not seek to replace traditional farming, but rather integrate this new system so that staple food crops can be grown all year-round.

Pazu Productions is a media production company that will work with activists and non-profit organizations to create content that influences the way people understand and care for the world. Our first initiative is a collaboration with Dr. Gary Altheim, the founder of Growth and Development Services Inc. (GDS), to create a short-form documentary demonstrating the immense healing power of music therapy and intergenerational relationships for people living with Alzheimer's and dementia.

Eliana Bloomfield '25 (She/Her)

eliana@concussionbox.org

Concussion Box is a concussion support organization dedicated to the idea that healing doesn't have to happen alone. We host an audio library of concussion stories and provide tailored concussion care packages to help bring comfort and resources to patients at the beginning of their recovery journeys.

DearCurlz is an online subscription service that delivers curly/natural hair products and styling tools monthly to empower customers with curly/natural hair. This will be done by providing detailed video instructions and designing a successful hair routine catered to specific needs. DearCurlz will partner with local shelters to donate products that customers return as well as create packages from recycled materials.

Animals of the People addresses the barriers low-income, and other financially-limited pet owners face when accessing veterinary care, with a focus on preventative medicine. We hope to bridge the gap through educational workshops, microgrants, and partnering with other organizations to create a more inclusive veterinary space for low-income pet owners.
