

DatGuy88's "Games vaguely similar to Lost in Lamine (LiL)" Guide (updated 20/08/21)

Obligatory 18+ warning

This mini-guide contains explicit (read:sexual) material and links to games featuring this material, often in picture form. If you are not 18 or older or your country's legal equivalent, then read no further. Additionally, some of the games on this list may contain extreme content that some people may not enjoy. You have been warned!

Foreword

This is my (personal) list of smutty 18+ games, many of which have elements similar to Gloss and Glamour's '[Lost in Lamine](#)' (LiL) choose your own adventure (CYOA) game. Obviously what one characterises as 'similar' is subjective, but generally anything involving Latex, BDSM, Dom/Sub play and/or submissive sex I've broadly categorised as similar. I have also collated a few other excellent games in the second section that are well worth playing, but are somewhat different from LiL. Games marked by a (*) are feature complete. I made this list as trying to find good NSFW games half the time feels like I'm a frontier colonist panning for gold. Hopefully this list will help people find some fun and sexy games to enjoy ^^.

What I'm a fan of:

Most vanilla stuff, MxF, FxF, sex toys, BDSM/bondage, Sub or Dom play, TF-based content (mostly physical, feminisation or masculinisation). Oh and I guess latex is okay too ;)

Games that are similar to Lost in Lamine

HTML

[Choker Change \(*\)](#) - (warning: some slightly extreme content)

[Corruption of Champions 1 \(*\)](#) (CoC1) - Large sandbox in a fantasy/RPG setting with lots of content. Mainly text with some 2d art for avatars. Like its younger brother, Trials in Tainted Space, the game has plenty of varied material from vanilla sex, humiliation, BDSM and (lots of) transformation content. The encounter/exploration system is a little odd, but otherwise the gameplay is fairly fun and inoffensive. You may be interested in the large mods by [Kitteh6660](#) and [Xianxia](#) which add even more content to the game. Save editor [here](#).

[Corruption of Champions 2](#) (CoC2) - Relatively young, but a spiritual successor to CoC1 with Trials in Tainted Space-esque gameplay in a fantasy/RPG setting. I've personally not played much yet as I'm awaiting a more completed version to dig into, but I've heard good things about what's there. As with CoC1/TiTS, there's plenty of variety content-wise.

[Degrees of Lewdity](#) (DoL) - An impressive sandbox with many lewd elements, and simple (but effective) 2D sprites for the main character. Content ranges from vanilla to very depraved,

however most content is toggable. Fetishes include bondage (some), transformation, pet/animal-play, bestiality, crossdressing, watersports, D/S play and rough sex. You can play as a male or female, and pursue love interests, fight enemies, explore, and more! All characters and encounters can be tweaked to your preference (e.g. all male, all female, all futa, skewed mix of both etc.). But be warned -- the game has a lot of darker elements (read: sexual assault of the main character), so not for the faint of heart.

[Fetish Hotel](#) *Latex Content!* -

[Fort of Chains](#) -

[Free Cities](#) -

[Hard Times in Hornstown](#) - Big sandbox with 3d renders/art. Loads of content from vanilla stuff to BDSM to feminisation/masculinisation to chastity, and much more. There's something for everyone here, although the gameplay isn't the most riveting, it's also not too difficult to reach content (use the [official guide](#) if you want to pursue specific paths, many of which have endings).

[Lia's Adventure \(*\)](#) - Cute, fun and relatively short CYOA game focused on bondage. The game has a dynamic 2d avatar system which shows what gear the protagonist is locked up in, and has some sexy and light-hearted writing. I also recommend the author's other games which can be found [here](#). Two of them are bondage escape scenarios, and a few others are more akin to Lia's Adventure.

[Secretary](#) *Latex Content!* - Secretary is a erotic lifesim with a male protagonist. The game focuses heavily on slow physical TF (mainly feminisation), along with corruption, humiliation and BDSM. Mental changes (bimbofication) are also there but largely optional. There's quite a lot of content in the game, and there's a dynamically drawn avatar which will update depending on what clothes/gear are being worn and physical transformations. Highly recommended if you're into TF content, but there's enough other content that may appeal to others as well.

[Student X-Change Program](#) *Latex Content!* -

[The Broken Sensor \(*\)](#) -

[The Collar \(*\)](#) -

[The Repurposing Center](#) -

[Trials in Tainted Space](#) (TiTS) - A massive (!) sandbox in a futuristic sci-fi setting. The game is mostly text with some 2d art and caters to a lot of different tastes. It's got furry, TF content, vanilla, BDSM, petplay, humiliation play, MxM/MxF/FxF... the list goes on. And you can change your character throughout the game with items and through fights with fully reactive descriptions

to these changes. The gameplay isn't too intrusive and the story is fun. One of the best. Save editor [here](#).

RAGS

(note: I have not played much of these ones)

[Body Werk \(*\)](#) -

[Lilith Device](#) -

[Overseer \(*\)](#) -

[Slavers Game Chapter IV](#) *Latex Content!* -

[Space Ditz \(*\)](#) -

[The Druken Cowboy \(*\)](#) -

Ren'Py

[Harem Hotel](#) - Harem Hotel has a surprisingly endearing plot for a smutty game. On top of that you have fantastic 3dcg renders, some of which are animated, and colourful characters. The game revolves around creating a 'harem' of girls who live/work at your hotel. Themes include vanilla sex (MxF and some FxF), BDSM and exhibitionism, with a few other (mostly avoidable) kinks like watersports and lactation. It's a somewhat slow burn initially, but there's lots of content mixed in with a good story. Great stuff. If you enjoy this game, consider A House in the Rift.

[The Headmaster](#) - Well, the game is exactly what it says on the tin. You are the headmaster of a reform school with a focus on M/F, bondage and humiliation. And spanking. Lots of spanking. Each of the main girls has their own story, and can be 'punished' individually. Plenty of story mixed in as well over many hours of content, but some people may be turned off by the setting (highschool for adults). Still, looking past that it's pretty great.

[Kingdom of Deception](#) - The game's protagonist is a female noble who is captured by orcs -- it is up to you to uncover the mystery of who orchestrated the attack and to exact your revenge. There's several main paths in the game with both submissive and dominant scenarios, as well as some BDSM/bondage. The art in the game is gorgeous. You may want to use a guide though, and be warned the release schedule is a bit batty (read: slow).

[Latex Dungeon Advance](#) *Latex Content!* -

[Lunar's Chosen](#) *Latex Content*! - This game takes place in the modern world but with a fantasy/magic-lite twist. Main foci are BDSM (I'm not sure why this isn't tagged on F95...), (optional) futa content, some TF themes, both male and female domination and... latex (with

one of the character's routes)! The game uses pretty nice renders for the most part, although some of the sizes of genitalia is purposely a little goofily sized in places. But hey, it's a game about magic, so I guess we can't complain that much. Very fun and lighthearted with options to skip content you're not into, so give it a go!

[Pale Carnations](#) - You follow a male main character in his rise through the ranks of a local club that focuses on bondage. Fetishes include bondage, humiliation and toys. Plenty of story and character content as well, and generally very good renders. Honestly, pretty great overall, although be warned it does have a bit of a dark undertone. Plenty of content to enjoy.

[Seeds of Chaos](#) -

RPG Maker

[3072AD](#) *Latex Content!* -

[Caliross](#) - Takes place in a fantasy world with a female protagonist who is trying to uncover her heritage. The main story is interesting and the game has a number of fun characters and storylines. Lots of sex, usually (although not exclusively) with the protagonist on the receiving end, coupled with great 2d art and lots of CGs. There's lots of paths in the game so you can tailor your experience: TF content, cowgirl TF, corruption, BDSM, pony play, mind control etc. on top of more vanilla sex (MxF + FxF, threesomes). A number of these paths additionally have good and bad ends. The game doesn't have any RPG maker grinding which is a plus in my books. Also has a [detailed guide](#). One of my favourites.

[Lust Doll Plus](#) - A remake of the original Lust Doll game with more features and additional scenes in active development. Fantasy/RPG-setting with cute (and dynamic!) 2d art and sexy writing. Along with more vanilla activities, the game has plenty of submissive (and some dom) sex scenes with BDSM/bondage, humiliation and orgasm denial play as key fetishes. Additionally there's lots of (mostly optional) TF content and other kinks. Pretty regularly updated, this one is a bit of a hidden gem I think. The only negative is sometimes the gameplay can seem a bit cryptic, especially at the beginning, but it's worth persevering.

[No Escape: Game Edition! *Latex Content!*](#) - A latex-focused game with a female protagonist. Fetishes include latex (duh), bondage and D/S play. VERY good renders, and hot writing. Generally has more of a sub-focus. Only issue is the game is a bit short at the moment, but it is being updated frequently. Definitely give this one a go if you're after something LiL-ish!

[Noxian Nights \(*\)](#) -

Other

[Elven Conquest Part 1](#) + [Part 2](#) -

[Lilith's Throne](#) - An ambitious sandbox in a fantasy world with a fully-interactive/controllable sex system and a hugely detailed inventory/clothing system. Sex can be dominant or submissive

depending on the encounter, and you can play whatever gender you want with the ability to transform as and if you wish! The game has several storylines, and these are actively being developed. Content includes bondage, slavery, pregnancy and furry content (optional). You can customise your preferences when starting a game to only experience things you want to (i.e. turn off furry content, non con, etc.). The gameplay is pretty fun and unobtrusive to the sexy times. *Highly* recommended.

[Third Crisis](#) - Very hot tactical RPG with a female protagonist. Lots of sex, with the protagonist usually on the (submissive) receiving end (MxF and FxF). Fetishes include BDSM (esp. male domination), corruption and mind control. **Top-notch 2d art** with some animations. The protagonist has a few different outfits and there is an avatar system that will update based on what your recent, er, activities have entailed. Gameplay isn't hugely complicated and doesn't get in the way of the sexy times. Monthly updates and an awesome game.

[Trap Quest](#) - (hot, but be warned some content is pretty extreme)

Games that are less relevant, but of interest

Listed herein are other great games but that are a little different from LiL. Many (although not all) of these games have TF content which isn't everyone's thing. Still, hopefully you can find things here that you might enjoy!

[Fanucci's Amazing Pizza \(*\)](#) - Fanucci's Amazing Pizza is a light-hearted sex romp that focuses around gender TF content. You're in complete control to explore the different paths of the game as you want. The game emphasizes consent and respects your choices; there are no wrong choices! Most of the paths in the game have full endings/epilogues which are cute and funny, and the 3d art renders are great. Most of the sexual content is fairly vanilla but well written. Extremely replayable, and each play through isn't very long (think ~30 minutes). Hot, cute, wholesome and undeniably sexy.

[The Last Sovereign](#) - This is a game absolutely brimming with content: >50 hours of game time, easy. The fantasy world it's set in is fully fleshed out with detail given to its people (culture, society, religious doctrines), the various races that inhabit it (from humans to elves to succubi, and more) and the characters that you meet along the way, many of whom are memorable. You build up a roster of companions over the course of the game whom you fight with and build relationships with (read: lots of sex). Although it has standard RPG maker fare, it also has largely unique gameplay that focuses on politics and kingdom building. Every once in a while, you'll have the ability to invest some of your money into various financial or infrastructure-related endeavors and these have critical ramifications to the story. Did you help fund an embassy for the dwarves? Well they'll owe you a favour in the upcoming political talks! Did you not invest in roads? Well it looks like your army is starving because your supply lines suck. Did you help upgrade the smithy? Well now they can make some top-tier armour for your companions. I can't express how insanely fun and detailed this game is -- and the fact it has lots of sex is just a cherry on top (sex is fairly vanilla, although pretty hot with there also being lots of

threesomes/orgies, MxF, FxF and some fetishes such as sub/dom play and bondage). My all-time favourite RPG maker game, definitely give this one a go if you want some good writing and unique gameplay with your smexy content. (Note: most sex scenes currently do not have CGs, but these are being added -- the writing is great, though, and there's lots of portrait art throughout). Here's a [walkthrough](#) for the current content.

[Once in a Lifetime \(*\)](#) - Mostly M/F with a little F/F if desired. Fetishes include pregnancy content and some light spanking. Most content is fairly vanilla with some threesomes and harem elements. But man. Combine this with excellent renders, a genuinely good plot and some great comedy -- and you have a recipe for one of the best western story-porn visual novels I've ever played. If you're after something light, fun and engaging, give this one a go!

CURRENTLY UNORGANISED MESS (not all will make the final list...)

Appendix 1 - Useful websites

Below are some sites where NSFW games are regularly posted and updated. I do not pretend this guide to be at all exhaustive, and obviously this is slanted towards my own personal tastes. Ergo, if you want more games catering towards your own preferences, check these out!

[F95zone](#) - NSFW game forum catering to everything under the sun, very large repository. Can sometimes be difficult to sift through, though. Search using various filters/tags [here](#). Need to create a (free) account to download content.

[TFGames](#) - Games focusing on various transformative content (anything from feminisation/masculinisation, mind control, physical transformation, furry etc.) are posted here. Lots of smaller or earlier versions of games get posted here first, good way to find shorter and/or new and upcoming games. You can search the entire database by going [here](#), hitting advanced search and searching certain tags (you can also select all six 'development status' tags to look at all games).

[itch.io](#) - General game site, but there are a few very good adult games here (e.g. Lust Doll, Heroes Harem Guild, etc.).

[HypnoCollective](#) - Games focusing on mind control and mind TFs. I've not used, but I believe it requires a (free) account.

Reddit - There's several relevant subreddits; I don't know why there are so many (???). Here are the four most popular ones in descending order of popularity:

[r/NSFWgaming](#)

[r/LewdGames](#)

[r/Adult_Gaming](#)

[r/NSFWGames](#)

If in doubt, just use the first one or two, >90% of the content gets posted there.

Appendix 2 - Other NSFW game lists

I don't know many NSFW game lists, but here's a couple I found whilst making this guide.

[Adult_Gaming's list](#)

[Lewdgames's list](#)

Appendix 3 - Useful tools/commands

I included these on the basis that 1) some games' gameplay can be rather grindy and 2) trying to access new content following updates can sometimes be annoying if saves break. Using these save/variable editing techniques will allow you to reasonably quickly access content. I take no responsibility for saves/games being broken -- **always back stuff up!**

[RPGmaker save editors](#) - Use these to modify save files used by RPGmaker games. Always backup your saves in case something goes horribly wrong. You can increase EXP/money pretty easily, but other modifications are certainly possible by editing switches and variables.

[Instructions on how to unpack RPG maker games \(XP, VX and VX Ace\)](#) - Useful for getting images from RPG maker games (read: CGs) as well as for some save editing and other applications.

[All-in-one online save editor for RPGmaker, Ren'Py, RAGS, Wolf RPG and more](#) - Pretty flexible, but only a limited number of edits per minute. Again, always back up your saves.

[Debugging/Cheating in Twine variables](#) - Lots of HTML NSFW games use twine. You can edit many of these using the console. F12 -> type 'SugarCube.State.active.variables'. Often you can change player stats such as money by then going to '.player'. Again, back your save(s) up before breaking everything.

[Debugging/Cheating in Ren'py games](#) - See the included instructions. Once the console is enabled, simply use shift-O to open. Note what/how you edit variables will vary quite a lot game to game, and, as ever, back your stuff up before you start mucking around with variables willy nilly.
