

Attendance Reminder

- From your dashboard, take the total number of assignments and divide it by the days of enrollment to figure out how many assignments you must complete. The genius dashboard will also provide you with “recommended pacing” as an option on the left of your screen.
- Elementary= total assignments divided by 90 will give you the daily total. Multiply by 5 for the weekly total and round up if the number is a decimal – ex. $20.3 = 21$
- MS = total assignments divided by 45 will give you the daily total. Multiply by 5 for the weekly total and round up if the number is a decimal – ex. $20.3 = 21$
- HS= Since you are on a block schedule you will need to look at each course individually and take the days of enrollment and divide by the total assignments. Add up your results for each course to find your daily total and round up if the number is a decimal– ex. $20.3 = 21$

In most courses, you will need to complete 1 assignment per day per course in order to stay on pace. Some courses may require a faster pace depending on the assignments and your enrollment period. All work must be completed by the course END DATE.

Assignments Due Weekly

- K -13 assignments per week or on pace/ahead
- 1st – 15 assignments per week or on pace/ahead
- 2nd – 13 assignments per week or on pace/ahead
- 3rd – 13 assignments per week or on pace/ahead
