

Drivers Education

- I. Aims and Objectives:

Students will gain the knowledge required to pass the DMV test. They will learn the laws of driving on roads, alleys, freeways, and city driving. They will be able to know when they or the car is in trouble and how to handle it. The students will learn that driving is a privilege, not a right. They will also know the effects of drinking, and doing drugs while driving. Students will learn what is required to take the DMV permit test for their permit, and how long they need the permit before being able to get their license. They will also learn how long they need their permit before they can get their license. They will learn how to be a responsible driver and to be courteous to others.
