CAD MS TRUST OFFICE

CAD MS UNITS

NGO- Care At Door Medical Services (CAD MS) Trust

The **CAD MS Trust** is a charitable Non-Governmental Organization-**NGO,** established on **28th February 2009** by our **Chairman Dr. Sreedhara K C** {MBBS. MD. MHA. MLE. FNR (UK), Dip CMH(NIMHANS), Medical Director & Consultant Neuro Physician/ Rehabilitation/ Mind Health/ Medicolegal **and Mrs. Deepa** at Vijayanagar.

The organization is **registered under 12 A, 80 G and FCRA** with the Department for Empowerment of Differently Disabled & senior citizens of Karnataka, Ministry of Social Justice Delhi & NITI Aayog of India.

VISSION

"Care you can trust" with an inclusive society free from discrimination where persons with disabilities become contributing members, living with dignity and respect.

MISSION

CAD MS TRUST strives to deliver best medical care. We strive to be your "Home away from your home" – a place where you and your loved ones could rely on for all your healthcare needs

OUR UNIQUENESS

- **Access**: Healthcare being a right of every individual, should be accessible to all
- **Affordability**: We believe that for healthcare to be universally accessible, it should be affordable
- **Resident centered**: Our resident centered approaches help us deliver the best services to all the residents
- **Wellness**: We support general wellbeing of an individual by supporting wellness
- **Empowerment**: We believe that people living a healthy life contribute to their community's success in the best possible way

INSPIRATION TO START THE CAD MS TRUST FOR THE MEDICAL CARE.

The word CAD is designed in consultation with Dr Muralidhar when Dr. Sreedhara KC was working at NIMHANS in Casualty department. It is inspired by the NIMHANS culture and need of the patients from the Home care, Rehabilitation in affordable way. Therefor decided to register the Trust in Saraswathi Nagar and to consider the existing residence Car shed as Trust office.

Dr Sreedhara K C and his wife Mrs Deepa S registered a Charitable Trust in the name of CAD MS (Care At Door Medical Service) and in Vijaya Nagar Sub registrar office on 28th February 2009.

EXTERIOR BUILDING

FIRST TRUST OFFICE, SARASWATHI NAGAR

Deepashri De- addiction Center

INTERGRATED REHABILITATION CENTER FOR DE ADDICTION (IRCA)

DEEPASHRI DE-ADDICTION CENTER (DDC) was established at Nagarbhavi, Malagala shifted to Nagadevanahalli, Bangalore on 12-08-21 under the CAD MS trust.

The center has private, semi-private and triple sharing rooms with TV, attached toilet, wardrobes, separate kitchen, dining hall, Yoga, Gym etc. Doctor, nursing and attendant care is provided to all the inmates. The residents can be relaxed with homely atmosphere. The advice, treatments and facilities offered are for the benefit of family members and friends of addicts.

Issues of drug addiction

- Loss of interest in sports and daily routine.
- Loss of appetite and body weight
- Unsteady gait, clumsy movements, tremors
- Reddening and puffiness of eyes, unclear vision
- Slurring of speech
- Fresh, numerous injection marks on body and blood stains on clothes

- Nausea, vomiting and body pain
- Drowsiness or sleeplessness, lethargy and passivity
- Acute anxiety, depression, profuse seating
- Changing mood, temper, tantrums
- Depersonalization and emotional detachment
- Impaired memory and concentration and
- Presence of needles syringes and strange packets at home.

Factors associated with high risk for drug abuse

- Unemployment
- Living away from home
- Migration to cities
- Relaxed parental control
- Alienation from family
- Early exposure to drugs
- Leaving school early
- Broken homes, one parent families
- Large urban environments
- Areas where drugs are sold, traded or produced
- Certain occupations
- Areas with high rates of crime or vice
- Areas where there are drug using gangs
- Areas where delinquency is common

Deepashri Special School for Intellectual disabled children

#38, 16TH Cross, Saraswathi Nagar, Vijaynagar, Bangalore-560040

Deepashri Special needs school is established in **12 December 2018** for the **intellectually disabled kids like autism, ADHD, learning deficit** etc. The school acts as a channel for **providing security, education, nutrition and health care**. With the help of different groups of specialists and stakeholders, we create compelling initiatives to ensure quality of services with vocational training. Currently we are successfully running one initiative. Through this school**, we have effectively impacted hundreds of beneficiaries**. We also focus on the overall growth and development of children.

INFRASTRUCTURE

The School boosts of well equipped, ventilated and spacious class rooms in a clean, hygienic and pollution free atmosphere. The school admits both boys and girls. The medium of instruction is English/Kannada

ABOUT THE BENEFICIARIES/ STUDENTS

The chronological age of the beneficiaries of the Special School should be from 5-18 years of age. The size of the Schools should be the total strength of 25 to 30.

WHY CADMS SPECIAL ACADEMY?

It caters the present needs of the child to your expectations at various levels for all-round development, physically, emotionally and spiritually. It is our Moto to guide and equip the child with all extracurricular skill, which moulds the child's future. Our staff offers the child what he needs most in competitive atmosphere to face the future challenges boldly.

AIM

All school going children, whether they are disabled or not, have the right to education as they are the future citizens of the country. Some children with special needs may not benefit from regular classroom education due to various reasons including disability. In such a case, it is only appropriate that they be provided with education in some other meaningful way. This entails changes in curricular decisions and classroom arrangements, provision of aids and appliances, arrangements for finances and above all, appropriate teacher preparation. The most important aspect of this situation is the economics of developing such a large task-force of personnel to meet the needs of persons with disabilities, whose prevalence is usually quoted as 'one in ten'.

OBESITY AND UNDERNUTRITION –TWO FACES OF THE SAME COIN

SREEDHARA K C[1], PARASURAMALU B G[2] KAUSHIK K N[3]
Postgraduate[1], Professor[2] Postgraduate,[3]
Department of Community Medicine, Rajarajeswari Medical College & Hospital, Bangalore

INTRODUCTION:

This is a kind of paradoxical situation , "double burden". Indeed obesity and under nutrition , as the two faces of the same coin, are both forms of malnutrition caused by inadequacies in the food system. According to the World Health Organization (WHO), some 43 million children under five are overweight or obese, globally 100 millions children under five are underweight[1] .

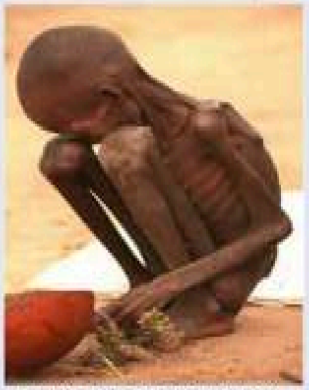

WHAT IS OBESITY ? "An abnormal or excessive fat accumulation that presents a risk to health".[2]

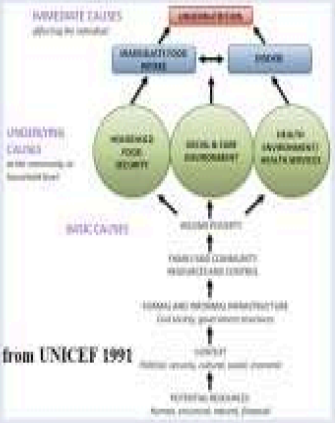

COMPLICATIONS OF OBESITY

WHAT IS UNDERNUTRITION?
"outcome of insufficient food intake (hunger) and repeated infectious diseases. Undernutrition includes being underweight for one's age, too short [3]

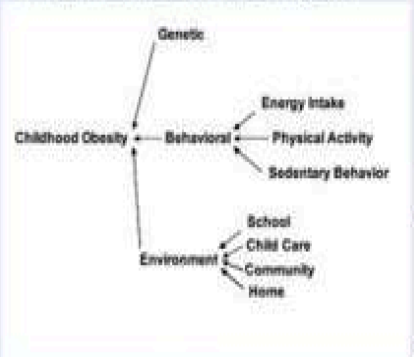

CAUSES FOR UNDERNUTRITION[4]

from UNICEF 1991

CAUSES FOR OBESITY- The fundamental cause of childhood overweight and obesity is an energy imbalance between calories consumed and calories expended.

OBESITY

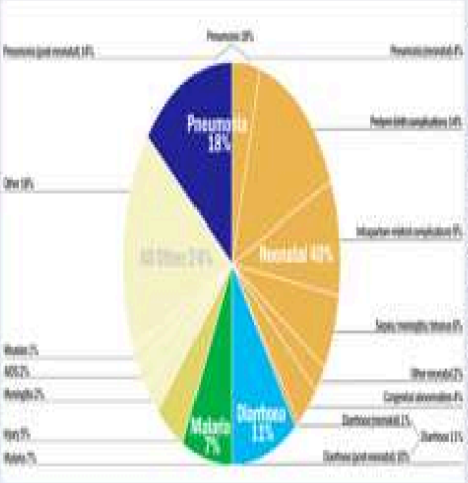

UNDERNUTRITION

A wide range of prevalence levels exist, with the prevalence of overweight in Africa and Asia averaging well below 10 per cent and in the Americas and Europe above 20 per cent.
In India, around 46 per cent of all children below the age of three are too small for their age, 47 per cent are underweight and at least 16 per cent are wasted. Many of these children are severely malnourished.

COMPLICATIONS OF UNDERNUTRITION

PREVENTION OF OBESITY

General recommendations:

1. Increase consumption of fruit and vegetables, as well as legumes, whole grains and nuts;
2. Limit energy intake from total fats and shift fat consumption away from saturated fats to unsaturated fats;
3. Limit the intake of sugars;
4. Be physically active

Societal recommendations

1. Curbing the childhood obesity epidemic requires sustained political commitment and the collaboration of many public and private stakeholders

PREVENTION OF UNDERNUTRITION[3]

1. Timely initiation of breastfeeding within one hour of birth
2. Exclusive breastfeeding in the first six months of life
3. Timely introduction of complementary foods at six months
4. Age-appropriate foods for children six months to two years
5. Safe and hygienic complementary feeding practices
6. Full immunization and bi-annual vitamin A supplementation with deworming
7. Appropriate feeding for children during and after illness
8. Therapeutic feeding for children with severe acute malnutrition
9. Adequate nutrition and anemia control for adolescent girls
10. Adequate nutrition and anemia control for pregnant and breastfeeding mothers

Poster presentation - **Morbidity profile of Sericulture workers** at RAMANAGR

Cocoon Market presented at September KACHCON 2015 held at Mangalore.

Sericulture also involves the use of natural resources and chemicals which can be harmful to the environment and public health. Formalin and bleach powders are extensively used as general disinfectants in all stages of sericulture. Pesticides, such as dyathin-M-45, are used in the mulberry plantations to protect the saplings. Reeling uses a large amount of steam, and consequently a lot of fuel and water. Air quality is affected by boilers emitting steam and gas

MORBIDITY PROFILE OF SERICULTURE WORKERS AT COCCON MARKET, RAMANAGAR DISTRICT, KARNATAKA.

Dr Sreedhara K C[1], Dr Raghuram. V[2]

1. Post Graduate, Department of Community medicine, Rajarajeswari Medical College and Hospital, Bangalore.

2. Associate Professor, Department of community medicine, ACS Medical college and hospital, Chennai.

Presented in KACHCON-2015

INTRODUCTION

sericulture is a major cottage industry in many countries, and India it plays an important role in the national economy. The annual production of silk in the world estimated at 45000 tonnes and India ranks second in silk production amongst the mulberry silk producing countries of the world. The workers at Cocoon market are engaged in several types of tasks and exposed to multiple, physical, chemical, and biological agents which make them vulnerable to various health problems that includes injuries, musculo skeletal disorders, allergies, irritation and respiratory diseases.

OBJECTIVES

To assess the socio demographic and morbidity profile of sericulture workers at cocoon market at Ramanagara District.

METHODOLOGY

Source of Data:
Sericulture Coccon market, Ramnagar, Ramanagar district.

Inclusion Criteria:
All the workers of 18years and above

Exclusion criteria:
a. All workers not able to participate.
b. Workers of aged 60 years above.

Study Design :
Descriptive cross sectional study.

Study period:
1 September 2015 to 30th september 2015.

Sample size:
Based on a study done by Khursheed ahmed wani and Y K Jaiswal in 2011 in which the prevalence of headache in rearing silk worms was 42.99% and the sample size was estimated to be 226 and rounded off to 230-Both regular and contract employees

Study material:
Ethical clearance from the IEC and informed written consent from the participants were optained.
Data regarding sociodemographic characteristics and morbidity profile were collected by interview method using a semi structure, pre tested questionaire

Data analysis:
The data was collected in Microsoft excel 2010 and results were expressed in terms of percentage and frequencies.

RESULTS

TABLE 1:SOCIO DEMOGRAPHIC CHARACTERISTICS OF WORKERS (N=230)

Age	n=230	%	Occupation	n=230	%
20-30	12	5.22%	Group A & B	9	3.91%
30-40	49	21.30%	Group C	71	30.87%
40-50	89	38.70%	Group D	150	65.22%
50-60	80	34.70%			
Education	**N**	**%**	**Education**	**N**	**%**
Illiterate	30	13.04%	SSLC	72	31.30%
Primary school	24	10.44%	PUC	24	10.44%
High school	24	10.44%	Graduation	56	24.34%

TABLE 2-SEX AND SYSTEM WISE MORBIDITY DISTRIBUTION

System affected	n=119	%	System affected	n=111	%
Eye Irritation	4	1.74%	Gastritis	36	15.65%
Hypertension	22	9.57%	Mouth Ulcer	19	8.26%
Diabetes	18	7.83%	Skin allergy	5	2.17%
Respiratory disease	46	20.00%	Headache	16	6.96%
Musculoskeletal	29	12.60%	Backache	35	15.22%

*Among 230 , 12(5.22%) were belongs to age group of 20-30 years, 49(21.30%) were in 30-40 years of age, 89(38.70%) were in 40-50 years of age and 80(34.70%) were in 50-60 years of age.

*Among 230 workers 30(13.04%) were Illiterates, 120(52.18%) were studied upto to school, 24(10.44%) were upto to college and 56(24.34%) were Graduates.

*Among 230 workers, according to www.mlnysore.gov.in, 9 (3.91%) were belongs to Group A & B (Director & Inspector), 71(30.87%) were belongs to Group C (FDA, SDA), 150(65.22%) were belongs to Group D(Attenders, Helpers).

* In a total of 230 4(1.74%) were suffering from Eye irritation (Allergy), 22(9.57%) Hypertension, 18(7.83%) Diabetes, 46(20%) Respiratory disorder(Asthama, Common cold), 29(12.60%) Musculoskeletal disorder(Arthritis), 36(15.65%) Gastritis, 19 (8.26%) Mouth ulcer, 5(2.17%) Skin allergy, 16 (6.96%) Headache, 35 (15.22%) Bakache.

DISCUSSION

*Among 230, 89 (38.70%) were in the age group of 40-50 years, 120 (52.18%) were studied upto school, 150 (65.22%) were Group D workers.
*Most of the workers were suffering from Respiratory disorders, Gastritis, Backache and Arthritis.

CONCLUSION

Sericulture being a labour intensive rural based industry offers qualitative and quantitative change in the poverty alleviation.
However, the health problems associated with working at sericulture market are more of physical and respiratory problems.

KEY MESSAGE

*Sericulture also involves the use of natural resources and chemicals which can be harmful to the environment and public health. Formalin and bleach powders are extensively used as general disinfectants in all stages of sericulture.
*So proper ventillation, lighting, exhaust, maintenance of instruments, protective measures like gloves, respirators are mandatory and proper disposal of coccon waste is required.
*Periodic Health checkup is mandatory.
