

2. Construction science principles

Worksheet 11: Voltages (learner)

The use of electricity and its supplied voltage varies with the function of the user. Electrical energy can be supplied in the following voltages.

- 12V
- 110V
- 230V
- 400V

In the table below, provide an example of each and state why this voltage is used.

Voltage	Example	Why this is used
12V		
110V		
230V		
400V
