

The Group Project Presentation: Sign-up and Schedule

Below the sign-up sheet for your final presentation. The rules:

1. Pick the slot that suits your whole group best. We require that everyone who contributed to the project is present during the presentation. If there is a good reason, we will accept virtual presence as well - but it will be your responsibility to set up the zoom link and make sure that all the members are present and able to answer questions.
2. **You need to hand-in your code 24 hours before the presentation - you will do this by making sure that your repo is updated and sending an email to Qian (Q.Tao@tudelft.nl), Eliska (e.greplova@tudelft.nl) and your team supervisor.** Your repo should have all your code well-presented and be runnable. Write a detailed README explaining what every file does and how to use your code. Don't forget the requirements file (examples below).
Examples of how well set-up repo looks like:
<https://gitlab.com/QMAI/papers/quantumresourcesml>
or
<https://gitlab.com/QMAI/papers/qdsim>
(obviously you will have less code and results since these are actual research papers from the QMAI group).
3. Very importantly: **your README needs to contain the section 'Individual Contributions'** where you describe in specific detail each team member's contribution to the final project.
4. **You will present for 15 minutes**, this can be a joint presentation or only one group member can present. However, we will ask the questions to the whole team. The question part will take about 15 minutes and we will ask you questions about both your code and the broader theory and reasoning behind your project.

That's it: put your whole team names in the sign-up sheet below.
