

Words Before the Guide and Game Start

1. Why Reset It, Why Create It

A Long Time Ago, I Had a Period of Game Development History in Mainland China, which was quite a while back, probably around 2016. At that time, I participated in the production of many games, which generally honed my skills and brought me a lot of rewards. However, due to personal family reasons and collaboration issues, the production eventually came to an end, and I also concluded my brief game development career in mainland China.

Subsequently, around 2021 during the pandemic, mainland China began a strict crackdown on adult games, likely part of the "cleaning the internet" campaign. Many production teams in the mainland fell apart, and websites like Heiwang (similar to F95) also faced severe crackdowns. In the end, the once chaotic landscape was left pristine. At this time, I discussed adult games in mainland China with friends in Hong Kong. I once again managed to bypass the Great Firewall of China and witnessed the devastation in the adult gaming community. Of course, I do not oppose China's policies or the means of enforcement; these are their laws and decisions. However, I still believe that the past adult game industry in mainland China had many interesting and engaging games.

Thus, the game you are now playing, "Rebirth: Rekindled Flames," was born. To consider readability and recognition, we ultimately chose to use simplified Chinese. Personally, I think this game is quite unique. It has created a pseudo-open world within the framework of RPG Maker and incorporated many exploration elements. When playing the original version, I felt that its core systems and some content were a bit rough. Therefore, in this remake, my team and I have optimized some of the less polished aspects. Additionally, regarding its CG, while Illusion's Honey Select is indeed an interesting game, I still find its graphics lacking; the physics effects are too basic, and the character effects do not quite match my preferences. As a result, we switched to Virt-A-Mate as our CG engine, and I implemented some elements that I consider important for RPG games, such as map teleportation and a quest system.

Many adult games in mainland China often feature poorly produced content, but there are also gems among them. "Rebirth" inherits the story and most of the main plot from the old game. I aim to maintain a balance between the original's pure love and NTR elements, and I plan to fill in the missing multi-character interactions and endings. I do not know if the portrayal of college life in China is as the author depicted, or if it has been significantly beautified, but I still believe it is a unique campus romance role-playing game. It has not been buried in the ruins following the internet clean-up, and this is its story, serving as a "prologue" before your gameplay. I hope everyone can find what they desire in this game, whether it be simple indulgence or engaging role-playing.

2. Notice Regarding Game Reposting

Regarding Reposting and External Release, both I and the Sweet Workshop production team maintain an open attitude. When reposting, please indicate the source and clarify that it is from us, the Sweet Workshop. If you want to support us, you can also include our link to the Gravity Circle when reposting. Who hasn't played a pirated game? However, I still hope that the content we spend a lot of time and effort to produce and remake can receive support from everyone (both materially and otherwise). Otherwise, if it's only support and ideals, that is unlikely to last long.

Additionally, to those who steal and sell our work on various platforms in mainland China, such as Douyin and Bilibili, and those who report us after taking our content, I wish you

prosperity and a family fortune, but all I can do is criticize you here. You probably hope that Sweet Workshop won't produce any "Sweet Guardians," but if we do end up creating them, then all I can say is to wish you good luck.

3.How to Purchase the Game and Access Paid Version Privileges

The game is currently in the crowdfunding stage. Everyone can go to our unifans to provide sponsorship and support: <https://app.unifans.io/c/sweetworkshop>

Currently, the content is divided into three tiers:

Basic Game Package at \$5/month, which allows early access to the game and participation in support votes (to decide the order of character resets).

Premium Sponsorship Package at \$10/month, which includes all the content from the \$5 package, plus AI experimental images and updates on CG content outside the game.

Collector's Package at \$30/month, which includes all the above content and adds voting options for updates on CG content for characters outside the game (you can vote to decide which character's additional CG will be produced). The greater significance of this package is to support us and enable a faster character CV reset. We plan to replace the old Chinese voice actors with pure Japanese voice actors, as we can no longer hire Chinese voice actors due to the situation in mainland China, which is why we chose Japanese voice acting.

Similarly, everyone can visit our official Discord for the latest updates and to support us. : <https://discord.gg/kUdMTD4Pd5>

4.About Free Version Update Notes

We do not oppose everyone playing the free version, and we understand that some friends may be unable to support us for various reasons. That's okay; after each version update, we will release a more stable version of the previous one. For example, if the current version is A and we update to B, we will release a stable version of A afterward, and so on. Therefore, I hope that if you want to play, you can patiently wait for our updates through official channels.

5.Regarding Translation Issues

Because the original text is very long, about 600,000 words, and even using Translate++ to extract and translate the text resulted in an overall excessive length, we used ChatGPT-4o for the translation. Afterward, my team and I revised and polished the text. However, there are still translation issues. Therefore, we have opened a correction section in the official Discord English area, where everyone can report any poorly translated parts they discover. In return, we will send in-game reward CDKs to players who help with corrections. Thank you all for your support.

Some Typical Issues Regarding the Game

Q1.Why are the characters misaligned and the game not displaying correctly after entering?

A1: This issue typically occurs on Windows 7 or earlier versions. Please right-click to start the game, select Properties, choose Compatibility Mode, and run the game as an administrator.

Q2. Why do some tasks show as completed in the quest log even though I haven't done them yet?

A2: This is a bug in the quest plugin that cannot be resolved at the moment. The quest reminder feature is just an auxiliary function (similar to a notifier) and does not affect the actual completion of tasks. So please avoid skipping through the storyline mindlessly and carefully review the character dialogues.

Q3.Why does the game sometimes feel laggy?

A3: This is because some of the new plugin technologies we are using in the game may not be compatible with the RM system. You can resolve this by going to the options menu and turning

the TERRAX global lighting setting to OFF.

Q4.What is the flow rate of time mode, and why does the time clock not change when time is skipped?

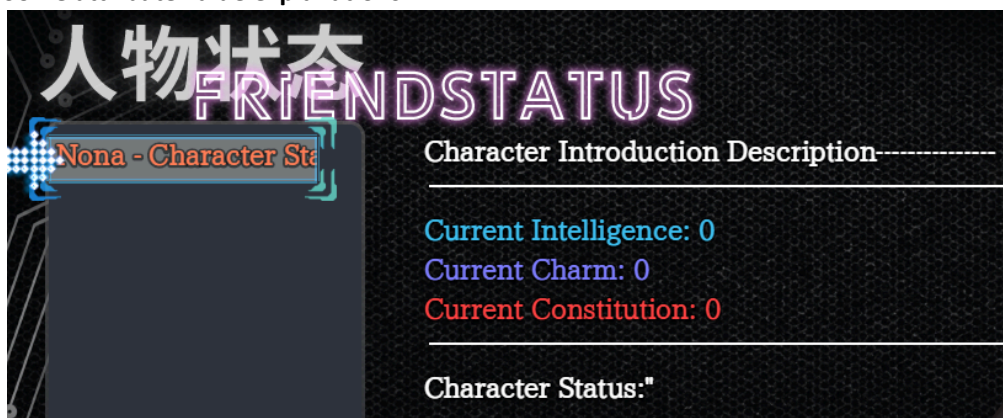

A4: In this game, the flow rate of time is 1:12 compared to real time, which can cause issues with time adjustments. After you choose to skip time, you need to switch to a different map for the clock display to recalibrate the time.

P.S.: Due to feedback from many players regarding the inconvenience of skipping time, this version has enabled the time skip feature in various locations, such as the dormitory, the computer lab on the third floor of the Business School, the library, the newsstand, the academic affairs office, and the shopping mall!

Walk through

This guide is limited to guiding you through the basic main storyline. To ensure your gaming enjoyment, hidden mission content will not be described in this guide for the time being.

Some attribute value explanations:

You can check the male protagonist's attribute values in the character status. Intelligence points temporarily affect the triggering of Liu Huamei's storyline missions. Charm points have not been implemented in this version, so you can ignore them. Constitution points affect the outcome of certain storylines (essential for pure love fans).

The female protagonist generally has two values: affection and corruption. Both values have a maximum of 100 points.

When the affection reaches 100 points, subsequent corruption storylines will be unlocked~ (Pure Love/NTR route).

Prologue.

At the beginning of the game, you can rename the male protagonist by pressing the "Tab" key on the keyboard, especially for certain N-party members—those who know, know. After following the storyline and watching a CG scene, you will wake up by the bed. Remember to collect your exclusive virtual AI assistant—Fox Spirit Xiao Yi.

Then, follow the main storyline guided by the map to arrive at the college entrance examination venue. If you want to see the hidden ending, you can save your progress.

The correct answers to the exam questions are DDAC.

If you're interested, you might as well try the incorrect answers for the BAD END.

Prologue ends.

After this, let me introduce a few key points: the coins mentioned in the guide are the money in the game, referred to as coins to avoid confusion with the lottery where you get 10 crystals for 90 RMB.

The fox refers to Xiao Yi.

At the shrine, you can draw feathers (which increase movement speed), attribute fruits, energy crystals, clothes, etc. For now, only the feathers and clothes are useful; getting feathers early can save you time in the storyline. The crystals for blessings can be found in various places and seem not to refresh. You can also buy 10 for 90 coins next to the blessing spot. What?! There are two other options to buy crystals in front; ignore them, you're not that broke.

Generally, studying and exercising default to one hour, as attributes gained will be the same if you exceed one hour.

Intelligence can be increased on the third floor of the Business School, the first floor of the library (once a day), and using the computer in your room (which reduces stamina and increases intelligence until stamina runs out).

Stamina can be exercised in the gym every night from 9 PM to 11:59 PM. Choose the "high-efficiency" option for +2, and the other option for +1. No matter which you choose, it will carry over to the next day, so make sure you have nothing else to do before finalizing here.

There's a barbell on the right side of the map above the school gate that can reduce intelligence and increase stamina.

The apartment is located in the upper left area between the library and the northern district on the map.

The car shop is to the left of the bar.

Old Wang from the takeout job has a good relationship requirement for certain storylines, so it's recommended to at least complete it.

Old Wang asks you to deliver takeout five times, which is enough. The working hours are from 12:00 PM to 12:59 PM and from 5:00 PM to 5:59 PM every day. You can go every day. The

location is in the cafeteria. Takeout deliveries go to the dormitory area, where there are three storyline points marked at the dorm entrance.

The bar has added a slot machine; if you have nothing to do, you can gamble a few times.

Campus Main Quests.

Here are a few commonly used shortcut keys to remember:

Q key: Jump over obstacles/characters or certain buildings.

M key: Quick map (if you can't find your way, remember to switch to the map anytime!!!)

F key: Use the phone.

E key: Call Xiao Yi.

First, talk to the security guard at the entrance, then head north to report to the front desk of the academic affairs office. You can collect a gift package in advance at the bank (press M to view the map). Inside, you'll find a red line that increases affection, a student card (which allows you to ride the bus for free), coins, an electric scooter exchange voucher, crystals for the lottery, and energy crystals (which can be fed to the fox). The fox's most useful functions for now are dancing and teleporting; currently, it can only teleport to the dormitory and will unlock more teleport options after completing the class monitor election task. Eating energy crystals drawn from the lottery has no effect; for now, the fox can eat a maximum of two.

After reporting, you can choose to take the bus (10 coins). Alternatively, you can go to the shrine first to collect a compensation package, which includes 1000 coins and 10 crystals. The crystals can be used for the lottery, so it's best to save before drawing; it's a good idea to draw a feather now. After offering your prayers to the bull statue on the right multiple times, you will be asked for a password. If you don't know it, you can repeat indefinitely, but you'll need to reload your save file (inside is a tester's package). Then go to the dormitory, have a conversation with Zhang Bin at the entrance, and then head to your own dorm room.

Your phone will remind you that this month's living expenses of 1000 coins have been credited. (Every day when you sleep and wake up, 20 coins will be deducted from your account for living expenses. If you don't have enough funds, the game will end forcefully, so remember!)

First, go to the second floor of the library to study; you have only one chance there, which will increase your intelligence. Then, go to the first floor to study, which will also boost your intelligence. Finally, head to the computer lab on the third floor of the Business School to study and increase your intelligence. After studying until 2 PM, you'll have exactly 6 intelligence by the end of the first day. (Jumping time requires switching maps to clock to display correctly.)

Go to the second floor of the Business School, Class 121, to attend the class meeting!

Head to the teacher's office on the fourth floor to sign up for class monitor, then go to the second floor of the Academic Affairs Office to find Xiao Qing and register for the student council interview.

Go back to the classroom to collect votes from your classmates! (Classmates will only be in class from Monday to Friday afternoons.)

Wang Zhitiao's vote: 100 yuan, go directly to the adjacent Class 122 to find the NPC and buy the information, then return to talk to him.

Liu Lei's vote: Before heading out, go to the newsstand to buy 5 newspapers, then talk to the newspaper seller to purchase "Dragon Tiger Leopard." After that, go back and talk to him. (There's also a hidden item option: don't buy the newspapers. Wait until the first Saturday to work at the library; when you enter the attic on the second floor, you can get "Jin Ping Mei." On Monday afternoon, give it to him to receive an unnamed ancient jade. Hidden item 1.)

Liu Huamei's vote: Increase your intelligence to 10 points, then talk to her. Complete the simple quiz to proceed. (You already have 6 intelligence on Thursday, and going to the library and computer room to study on Friday will be enough to reach 10 points.) For the quiz, choose "giraffe" to receive a bookmark, hidden item 2. Before completing the class monitor election task, keep your intelligence below 29, especially avoid reaching 20 intelligence before finishing the library event on the second floor, or it may cause a bug.

Li Boliang's vote: First, talk to the NPC in the neighboring class to buy information. Then, after 9 PM, go to the gym, obtain the item "stockings," and deliver it to him. You will complete the election just in time for Friday. (At night, do not go to the gym. On the second Saturday night (it's recommended to sleep straight to Saturday), go to the gym to get the shoes, and then on Monday afternoon, give them to Old Li to receive the crystal jewelry, hidden item 3.)

On the first Saturday morning, go to the second floor of the Academic Affairs Office to participate in the student council.

The answers for the student council interview task are CBCCB.

At this point, the prerequisite tasks are completed, and you can start pursuing the four ladies. From 12:00 to 12:59, you can go to the cafeteria to give gifts and increase affection. First, deliver the red thread gift bag, which adds 10 affection points.

Female Character Tasks

Lin Qingxin: Attend classes on time from Monday to Friday and answer questions, then follow the process. Once the affection points reach 100, the storyline for this version will end. Before the corruption storyline at 100 affection points, after talking to the teacher, you need to eavesdrop at the principal's office at 9 PM. Only then will the task of finding the cleaner on Saturday morning appear. After entering the room, choose the pure route.

Pure Route: Go to the principal's office on Monday, then meet the teacher and go to the teacher's dormitory, A Building, Room 302 at 9 PM. After the CG, go to sleep, and then call every day between 6 PM and 8 PM.

NTR: After the CG, call every day between 6 PM and 8 PM.

Lin Zhiyun: Work at the library + increase affection, then follow the process.

Affection reaches 100 points, and there is an NTR option.

Pure Route: After the CG, call every day between 6 PM and 8 PM.

NTR: After taking a nap, call every day between 6 PM and 8 PM.

Ning Yingxue: Work at the gym + increase affection, then follow the process. Affection reaches 100 points, and there is also an NTR option. You must have a physique above 22 to choose the pure route.

Pure Route: After the CG, a prompt appears at 9 PM to call every day between 6 PM and 8 PM.

NTR: After the CG, take a nap, then call every day between 6 PM and 8 PM.

Chen Mengyan: On Wednesday, after receiving a call from senior Xiaoqing in the dormitory, just follow the task reminders. The first task is to go to the cafeteria to post advertisements. The second task is to pick up trash at the gym. When you encounter the Liu Huamei task at the hotel on Saturday, complete the Liu Huamei task first and do not go to the student council to receive a task. Wait a week to complete Chen Mengyan's task to avoid bugs. The third task is to find sponsors at the café, hotel, and gym. The fourth task is to go to the school entrance and post advertisements near the store above the library, on the left side of the store. After submitting the task, go to the library and cafeteria to trigger the event. If your affection is not enough to reach 100, give a gift at noon to reach 100 affection so that later tasks can be triggered. The fifth task is to go to the bar to get sponsorship funds; you need to have a physique above 20 to pursue the pure route. Regardless of which route you take, make sure to have a conversation with Xiaoqing after the CG, as you need to give the sponsorship fee to trigger Xiaoqing's event.

Pure Route: Trigger the event after 9 PM and call every day between 6 PM and 8 PM.

NTR: Trigger the event after 9 PM and call every day between 6 PM and 8 PM.

Liu Huamei: After reaching 20 intelligence points, go to the second floor of the library to find her on Mondays and Fridays during the day for the storyline. At 30 points, go to the second

floor of the library to sign up for the competition. The first competition is on Sunday at 8 AM at the student council, the second is on Sunday morning at the hotel, and the third is on Saturday morning at the hotel. When you have this task, do not go to the academic office to do Chen Mengyan's task to avoid bugs. There is an NTR option here, which refers to the two choices before the final competition; choosing "no confidence" leads to the N route. **(The answers to the question bank are attached at the end of the guide.)**

Pure Route: After the CG, there will be a reminder on Friday to call between 6 PM and 8 PM. After the call, the plot will develop on Saturday, and you can choose either the pure route or the dark route.

NTR: There will be a reminder on Friday to call between 6 PM and 8 PM. After the call, the plot will develop on Saturday, and you can choose either the pure route or the dark route.

Standard Route: You will directly get a dual CG with no further developments.

Dark Route: Go to the left side of Building A, the second floor of the library, and the right passage outside the library to solve the puzzle. After completing it, go to the apartment to view the CG, which will temporarily conclude the storyline.

Xiaoqing: After the CG of drinking alcohol in the campus belle route, trigger the event on Wednesday between 6 PM and 8 PM after returning the money.

Pure Route: After the task, there's a CG at the dormitory at 9 PM. After sleeping, go to the academic office at 9 AM the next day, Saturday. After the plot, call between 6 PM and 8 PM to enter the apartment.

NTR: After the CG, the event is triggered at 9 PM, and then go to the academic office in the evening. After that, call between 6 PM and 8 PM to enter the apartment.

Chu Mengyao: Start the conversation with Li Boliang in the dormitory. The two options in the gym are irrelevant. When going to the hotel to find evidence, you need to build up goodwill with Wang, the delivery guy, as a prerequisite. The final intimate option has some relevance later, allowing Li Boliang to earn 2000 gold coins (multiple CGs, and you can also call to enter the apartment). After giving her a break, you can call her to have her appear in the apartment (I mentioned where in the earlier strategy), and you will receive an RBQ.

Purchase gifts through the mall and give them to the girls in the cafeteria at noon to speed up the progress of the Strategy!

PS: Working as a delivery person will increase Wang Xifan's hidden affection level, triggering interesting events~

Attachment - Liu Huamei Q&A

The question bank for Liu Huamei's storyline is attached at the end of the Walkthrough~ Just for learning fun knowledge~

1. In the solar system, which of the eight planets rotates in the reverse direction from east to west?

- A. Saturn
- B. Venus**
- C. Jupiter

2. What is the first digit of the square root of 876912?

- A. 7
- B. 8
- C. 9**

3. In Greek mythology, what type of tree did Daphne ask her father to transform her into to escape Apollo's pursuit?

- A. Peach tree
- B. Laurel tree**
- C. Apple tree

4. In financial news, what does "MO" often refer to in commentary?

- A. Cash with high liquidity**
- B. Futures
- C. Gold

1. Rites, music, archery, charioteering, writing, and mathematics are collectively known as the "Six Arts." What does "charioteering" refer to?

A. Commanding troops

B. Driving a chariot

C. Martial arts

2. "At one moment, strength lies in power; over a thousand years, victory and defeat depend on reason." Who said this famous quote?

A. Cao Yu

B. Sun Bin

C. Bai Qi

3. "Madmen, poets, and lovers are all products of imagination." From which work of Shakespeare does this sentence come?

A. Hamlet

B. A Midsummer Night's Dream

C. Romeo and Juliet

4. Wang Guowei divided poetry into three realms. What is the third realm?

A. Searching for her a thousand times in the crowd, I turn my head unexpectedly, and there she is at the dimly lit place.

B. Last night, the west wind carved the green trees; alone I ascend the tall building, gazing at the endless road.

C. The waistband gradually widens, but I have no regrets, for I have withered away for her.

1. Mr. Wang recently changed his QQ signature to "Celebrating the joy of having a son." What is the happy event in Mr. Wang's life?

A. Moved to a new home

B. Had a boy

C. Had a girl

2. In games, what does the exp value represent?

A. Experience points

B. Attack power

C. Defense power

3. What is the growth cycle of eyebrow hair?

A. One month

B. Two months

C. Three months

4. Where are the most sweat glands located in the human body?

A. Chest

B. Legs

C. Palms

1. Which vitamin does ultraviolet light promote the production of in the human body?

A. Vitamin B

B. Vitamin C

C. Vitamin D

2. What is the average distance between the Moon and the Earth?

A. 380,000 kilometers

B. 390,000 kilometers

C. 400,000 kilometers

3. Gold jewelry is usually represented by K to indicate gold content. What does 18K represent in terms of gold content percentage?

A. 50%

B. 70%

C. 75%

4. Who proposed the polyphasic sleep method?

A. Van Gogh

B. Da Vinci

C. Picasso

5. Which part of the human body is referred to as the "sea of qi"?

A. Upper Dantian

B. Middle Dantian

C. Lower Dantian
