

OCD Mindstorm

Medium: assemblage of digital artifacting with added acrylic

Dimensions: 37 cm x 50 cm x 0"

Price: \$150.00

Year Completed: 2019

Primary Discipline: Digital Media

Description:

In graphics software (Flash), the outline function (with variable line width), was repeatedly run over and over and over etc---- until the original image had broken down into digital artifacts. This method mimics an ocd episode pushed beyond its limits to destructively 'blow it up'. Then the resultant pieces were assembled into a sort of reflection to understand the process.
