

## VidMix Privacy Policy

App: VidMix

Package: com.baidarsoft.Vidmix

Developer: Syed Waris

Organization: Waha Studios

Last updated: June 4, 2026

This Privacy Policy explains how VidMix ("we", "us", "Waha Studios") collects, uses, and shares information when you use our Android application on Google Play. By installing or using VidMix, you agree to this policy.

### 1. Summary

- No account or sign-in is required.
- We do not read your contacts, SMS, call logs, location, camera, or microphone.
- We do not browse your photo or music library without your action.
- Downloads are stored on your device; you can delete them in the app.
- We use Google Firebase Analytics and Firebase Remote Config (see Section 6).

### 2. Information we process

#### Links you provide

When you paste or submit a URL, VidMix sends it to our media resolution service to obtain download links, titles, and available formats. Do not submit links you are not allowed to access under the source platform's rules and applicable law.

#### Technical data

Our servers and third-party APIs may receive standard request data (for example: IP address, device type, app version, timestamps) needed to process your request.

We do not intentionally collect passwords, private messages, or unrelated files from your device.

### 3. Data stored on your device

- Downloaded files are saved in app storage and may also be exported to your device gallery (videos) or music library (audio) when export succeeds.
- A copy may remain in the in-app Downloads folder.
- Preferences (for example: disclaimer accepted, paste permission acknowledged) are stored locally on your device.

- You can delete downloads from the in-app Downloads screen or uninstall the app to remove local data.

#### 4. Clipboard

VidMix reads the clipboard only when you tap the paste action, and only after you allow the one-time paste permission dialog. We do not monitor or upload clipboard content in the background.

#### 5. Android permissions

VidMix requests only permissions needed for its features:

- INTERNET — fetch media information and download files from links you provide.
- ACCESS\_NETWORK\_STATE — check connectivity before starting downloads.
- WRITE\_EXTERNAL\_STORAGE (Android 9 and below only) — save exported media to gallery on older devices when required by the system.

On newer Android versions, gallery export uses scoped storage provided by the system; the app does not request broad storage access for normal downloads.

#### 6. Analytics and Firebase

We use Google Firebase Analytics to understand app usage and improve stability, including events such as app opens, screen views, link pasted (platform hint only), and download started, completed, or failed.

Firebase may collect identifiers such as an app instance ID and, where enabled on your device, an advertising ID. Data is processed according to Google's Privacy Policy: <https://policies.google.com/privacy>

We use Firebase Remote Config to deliver non-personal app settings (for example: minimum version, optional force-update messages, API configuration). No personal content is stored in Remote Config.

You can limit ad personalization or reset your advertising ID in your Android device settings. Uninstalling the app stops further analytics from that installation.

#### 7. Third-party services

VidMix uses third-party APIs and content delivery networks to resolve links and download media.

Supported platforms: Instagram, TikTok, Facebook, X (Twitter), Snapchat, Reddit. Each platform has its own privacy policy.

YouTube is not supported in the app.

When you open or share a file, other apps you choose may process that file under their own policies.

## 8. How we use information

- Provide download and conversion features you request.
- Maintain app security, diagnose errors, and improve performance.
- Deliver required or optional app updates via Remote Config.
- Comply with legal obligations where applicable.

## 9. Sharing of information

We do not sell your personal information. We share data only:

- With service providers that help operate the app (for example: Google Firebase, media resolution and hosting partners), under their terms and security practices.
- When required by law, court order, or to protect rights, safety, and security.
- If the business is transferred (merger or acquisition), subject to this policy or notice to you.

## 10. Children

VidMix is not directed at children under 13 (or the minimum age in your country). We do not knowingly collect personal information from children.

If you believe a child has provided information through the app, contact us using the email below.

## 11. Security and retention

- Network requests use HTTPS where supported by remote servers.
- Files on your device remain until you delete them or uninstall VidMix.
- Server-side logs from partners, if any, follow their own retention schedules.

## 12. Your rights

Depending on your location (including the EEA, UK, or California), you may have rights to access, correct, delete, or restrict processing of personal data.

Because most content is stored on your device, deleting downloads in the app or uninstalling VidMix removes that local content.

For other privacy requests, contact us using the email below.

## 13. International users

Information may be processed in countries where we or our service providers operate. By using VidMix, you understand that data may be transferred to jurisdictions with different data protection laws than your own.

## 14. Changes to this policy

We may update this Privacy Policy. The "Last updated" date at the top will change when we do. Continued use of VidMix after an update means you accept the revised policy.
