

> Ultimately, I hope this list decodes some of the incredible diversity held in Nick's orchard. More than a few times, when people would come to gather scion wood or buy a tree, they were overwhelmed by the amount of choices. I understand this because a large part of Nick's orchard is made up of rare apples. So I offer this list to anyone seeking apples that have proven to be highly disease resistant in western Oregon. The information following each variety is the location of the tree in the orchard. For example, N.Y. 74840-1 is located in the green section, in row four, number five.

>

> GREEN SECTION

>

> N.Y. 74840-1 (Row 4, # 5)

>

> N.Y. 75441-67 (Row 4, # 21)
