

Web of Science group

Your group will be searching Web of Science using the same keywords as everyone else. We will do this in order to compare search results and platforms. Perform the following search and then browse the results to answer the following questions.

Take 10 minutes to complete this exercise. Be prepared to report your findings to the class!

Instructions

1. Navigate to dartgo.org/envs7-02 and click on the Class Activity Links tab on the left hand side.
2. Open the Resource Comparison Google Sheet document and navigate to the tab on the bottom of the sheet for **Web of Science**
3. Click on the link for **Web of Science** in Cell A2
4. Type or copy paste the following search phrase into the search box: *gender and conservation*
5. Answer the following questions based on your results and add them to the google sheet:
 - a. How many search results did you get?
 - b. What form did the results take? (i.e. papers from journals, news articles, theses or dissertations, books, videos, audio clips, etc.)
 - c. How relevant are the results overall?
 - d. In general, where are the keywords occurring in the search results? (i.e. in the title, abstract, publication title, etc.)
 - e. How do you get to the full-text of the articles?
 - f. What options do you have to filter or sort your results?
