Abstract : Abstracts are written in English or Indonesian using Time New Roman font size 12, single spaced and with a text length of between 100-150 words. The English version of the abstract is written using English in the form of past tense and appropriate sentences. Results and conclusions are written in present tense. Abstracts are expected to be more communicative and not monotonous. The Indonesian version of the abstract is written using standard Indonesian with enhanced spelling. Writing abbreviations and mathematical formulas in the abstract needs to be avoided. The abstract briefly explains the problem, objectives, methods, results and conclusions.

Keynote : Word1, Word2, Word3

Introduction

Writing foreign terms must be italicized. The introduction contains background, a brief literature review, and research objectives. The number of pages in the manuscript is 20-25 pages with top margin: 2.54 cm; bottom: 2.54cm; left: 4 cm; right: 3 and A4 paper size. The manuscript uses endnotes and a bibliography. The endnote uses Times New Roman font size 10 pt with 1 spacing.

Image inserted inside *text box* and *figurescaption* (image caption) is placed below the image. Figure captions are numbered and the figures must be referenced in the text. Image captions begin with capital letters. Image captions with more than one line are written using 1 spacing. Images are drawn with a line width of 1 pt and should have good contrast quality.

Gambar 1. Plots of lineation (L) and FeO content showing negative correlation

1. Library Study / Theory Study

In the theoretical study section, the subtitle directly states the theory that will be used as a research reference. Theory explains the relationship between research variables. Quotations are written using an italic style font, 1 space. Each theory is written as the main source. Hypothesis development is explained in this section regarding research logic, supporting theory, and references to previous research.

2. Research methods

Contains how data is collected, data sources and how to analyze data

3. Results and Discussion

Results are the main part of a scientific article, containing: clean results without data analysis process, hypothesis testing results. Results can be presented with tables or graphs, to clarify the results verbally

Discussion is the most important part of the entire content of a scientific article. The objectives of the discussion are: Answering research problems, interpreting findings, integrating findings from research into existing bodies of knowledge and developing new theories or modifying existing theories.

Table. 1. Results of Multiple Regression Analysis

		Coefficients ^a			t	Sig.
		Unstandardized Coefficients		Standardized Coefficients		
Model		B	Std. Error	Beta		
1	(Constant)	2.462	.551		4.457	.000
	Leadership	.443	.173	.231	2.443	.004
	Career development	.312	.087	.346	3.245	.003

a. Dependent Variable: job satisfaction

Source: Data Processing, 2019

The table is created with a line width of 1 pt and *tables caption* (table caption) is placed above the table. Table descriptions that consist of more than 2 lines are written using 1 space. Table lines are prioritized only as horizontal lines while vertical lines are omitted.

4. Conclusions and Suggestions

Contains conclusions and suggestions. Conclusions contain answers to research questions. Suggestions refer to research results and take the form of practical actions, state for whom and what the suggestions are intended for. Written in essay form, not in numerical form.

Bibliography

The bibliography is arranged alphabetically based on the last name of the author cited. Bibliography text TNR 12 letters, 1 space, 6pt bottom space. The format for writing references follows **APA Style 6th Edition** as follows.
