📢 **We're Hiring! Senior Information Technology**

Gold Yacht Co., Ltd is looking for **Senior Information Technology** to support our IT Team.

📍 **Location**: Hlaing Thar Yar Township, Yangon
🕘 **Working Time**: Monday to Saturday (9:00 AM – 5:00 PM)
💼 **Position**: Senior Information Technology (1 Posts)
💰 **Salary**: Negotiable

🎁 **Benefits**: Ferry, Uniform & Lunch Provided

Senior Information Technology Specialist is responsible for managing, maintaining, and improving the company's IT infrastructure. This role ensures stable, secure, and efficient operation of servers, systems, storage, and end-user support services that enable business and payment process continuity. The position also provides technical leadership, mentors junior IT staff, and ensures compliance with IT policies and security standards.

Role Description

- Lead the installation, configuration, maintenance, and troubleshooting of IT systems including servers, computers, software, and peripherals.
- Manage IT infrastructure including Windows Server, Linux systems, storage, backup, and recovery solutions.
- Perform preventive maintenance and ensure smooth operation of IT systems supporting payment and business process flows.
- Administer system access, local and domain users, permissions, and security controls.
- Ensure compliance with company IT policies, security standards, and best practices.
- Provide advanced technical support to user departments and mentor junior IT staff.
- Oversee data backup, recovery, and storage capacity planning.
- Manage and improve IT helpdesk operations, ensuring timely issue resolution.
- Coordinate IT onboarding/offboarding for employees (accounts, devices, access rights).
- Maintain accurate IT documentation, system inventories, and technical reports.
- Liaise with vendors and service providers for hardware, software, and IT services.

Qualifications

- Bachelor's degree in Information Technology, Computer Science, or a related field.
- Minimum 3–5 years of experience in IT Support, System Administration, or a similar role.

- Strong knowledge of Linux systems and Microsoft Windows Server environments.
- Solid understanding of networking concepts (TCP/IP, LAN/WAN, VLAN, routing).
- Hands-on experience with storage, backup, and disaster recovery solutions.
- Ability to handle urgent system, storage, and backup-related incidents.
- Strong leadership, teamwork, and problem-solving skills.
- Good communication skills and the ability to work closely with cross-functional teams.
- Ability to work independently and manage multiple tasks under pressure.
- Experience with NAS, cloud storage, or hybrid environments.
- Familiarity with IT security practices, access control, and data protection.
- Experience using ticketing/helpdesk systems.
- Knowledge of firewall and endpoint security solutions.
