The Sullivan Institute

Interesting topic: a 1960's commune in New York City. What helps to make it interesting is the fact that it has never received any real recognition or review...it just kind of "came-and-went," mostly within the confines of its native Manhattan. The fact that the physical location of this commune was in some relatively large building in the Upper West side on a major Boulevard, makes it even more intriguing.

As it turns out, there were several notable members associated with the group (Judy Collins, Jackson Pollock), and former members drifted off as it disbanded and wound up working in established institutions, for example the New York Times and Columbia University.

Unfortunately, the article photograph in the WSJ is not a photograph of the actual building, but a superficial "atmospheric" image. Actual photos are posted below.

Maps

The building that housed the commune is just off the corner of Broadway and 100th Street. ([link1](#)) ([link2](#)) ([link3](#))

Reviewing author

Alex Mar does a great job with the review. As such, I posted a couple links to her current work below.
