

Signage examples

Worm Caddy sign example:

Lettuce give you a guide to what the worms eat...

Basically anything that has lived and died. Pasta, rice, bread, fruit etc, (They've emailed to complain about dairy products tho...)

They like it chopped up small for them to eat faster!

PS... Worms don't eat citrus, but dry peel makes amazing scented fire-lighters. Collect it for winter hygge joy.

PPS... Crabs and Meat – collect up your meaty leftovers and save them for the crabs. They love them!

Emptying instructions sign example:

Emptying the food wasted caddy

You can empty the food waste caddy, or leave it for our lovely cleaners.

Our composter is located ADD YOUR OWN TEXT HERE....

The box is insulated and black. Simply lift the lid and throw your worm food in. If it's whiffy or a bit insecty that's great! It means it's bio-digetsing well and nature is doing its job.

Please use the hose ADD YOUR OWN TEXT HERE.... to rinse out the caddy.
