

How to Get Any APP++ for iOS & Android

This is only working guide, **PLEASE READ everything** so you can safely get modded apps!

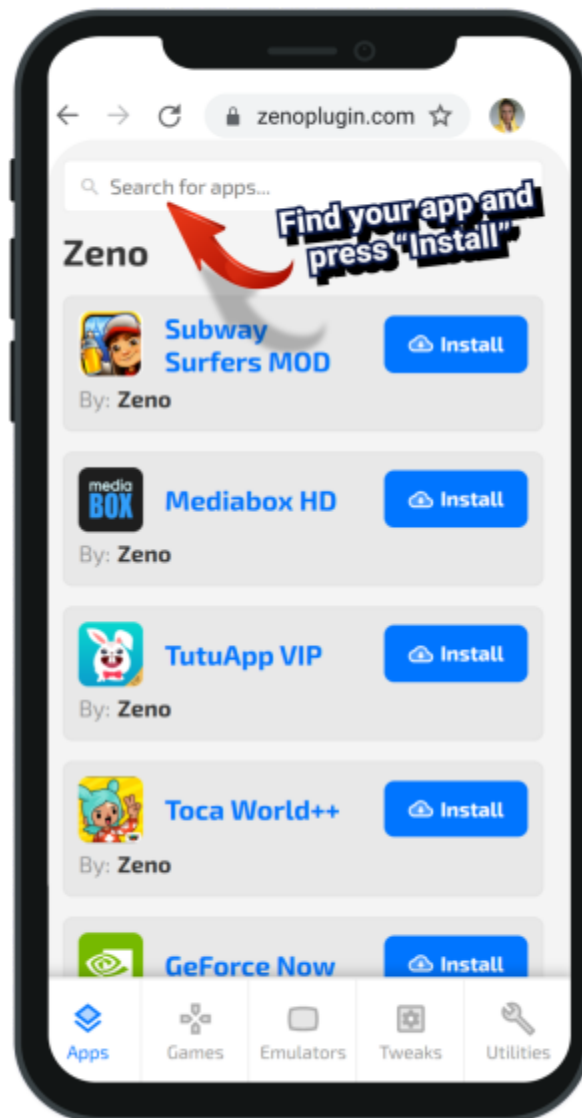

Step 1 - Open your safari browser on iphone , if your on android use google chrome or whatever you prefer

Go to:

zenopugin.com

Step 2 - Once it loads, choose app you are looking for and click “Install” button.

Step 3 - Then you will come to sponsored part, all my guides are free

and to keep them free you need to do 2 ads/offers. They are really easy like installing a game and reaching some level in the game or to do a survey etc.

Step 4 - If you did ads correctly your APP will be install.

SUPPORT

If you are not redirected to the guide after doing ads, try to do another one.

IMPORTANT

If you hit some survey offer, if you are redirected to some random page like sms submit, casino, adult pages etc, these are just pop up ads. Turn the page off and get back to locker.
