APPLICATION OF MACHINE LEARNING ALGORITHMS TO SIGNAL PROCESSING

Body Text

Set the bottom margin to 1.2 cm and all other margins to 2 cm. Use black 10-point Times New Roman, justified alignment and single line spacing. Save the file in .docx format. Cite sources using numbers in square brackets.

Format the reference list in APA style, an international style for scholarly publications [1]. Use Word's built-in equation editor for complex equations. Abstracts must be 2–4 full pages long.

Conclusions. Sample text…

Declaration on the Use of Artificial Intelligence. Include a declaration on the use of generative artificial intelligence (AI) at the end of the abstract. Authors take full responsibility for the content, accuracy, originality and scientific soundness of their submissions.

[1] Student in group 124-19м, Dnipro University of Technology, Dnipro

[2] Associate Professor, Department of System Analysis and Control, Dnipro University of Technology, Dnipro, Cand. Sc. (Phys.-Math.)

Example 1 (AI used)

While preparing this abstract, the authors used ChatGPT to check grammar and spelling. The authors reviewed and edited the output and take full responsibility for the final content of the abstract.

Example 2 (No AI used)

The authors did not use generative AI tools to prepare this abstract.

Submissions in which the text or results were generated entirely by AI tools are prohibited.
