SKILLSET

DESIGN

- Rapid prototyping
- Design systems
- Information architecture
- Data visualization
- Interaction design
- Wireframing
- Visual design

RESEARCH

- Journey maps
- Flow diagrams
- Survey design
- Data analysis
- User interviews
- User testing
- Lean UX

TOOLSTACK

- Figma
- Axure
- Adobe CC
- Maze
- Zeplin
- Notion
- Jira
- Slack

3+ years of experience working with government clients; creating applications that support mission-critical workflows for advanced users.

EXPERIENCE

User Experience Design Lead @ CACI, Inc.

Jul 2023 to Current

- Integrated legacy data visualization software into a complex web application for global force analysis (2023-2025).
- Consolidating data silos across 83 marine programs into a unified system for tracking utilization and Service member utilization history (2025-current).
- Leading early mockup design; prototyping complex interactions demonstrating workflows; eliciting and synthesizing feedback into actionable insights and establishing clear and testable product requirements.
- Writing, refining and reviewing product requirements; integrating agile frameworks to deliver value in sprint cycles.
- Building UX frameworks, reusable components and style guides; standardizing design maturity across product and engineering.

UX Design Intern @ ClearBlade, Inc.

Sep 2022 to Mar 2023

- Designed chart threshold settings for industrial IoT visualization dashboards used by 200+ large enterprises earning \$9+ million in annual revenue.
- Assisted prototyping for multiple core features: dashboard settings panel, table sort and filter, multi-level table sort, multi-level grouping of table rows.
- Co-facilitated remote moderated user testing of sort and filter designs that uncovered insight increasing SUS scores from 77 (good) to 83 points (excellent).
- Acted as scrum master to integrate a scrum-based delivery process reducing backlog items by 60% and establishing the team's first agile sprint schedule.

Product Design Lead Intern @ x²analytics

May 2022 to Sep 2022

- Designed AI-driven recruitment platform in a fast-paced startup environment; partnered with CEO to refine the PRD; established an early design system with 50+ reusable components reducing dev handoff time by 50%.
