

First to Find..

Directions: Select 4-8 students to play and put one less chair than students playing in the front of the room. Then announce what object the students are to find (list below). Students in the class can search for these objects to give to the students playing. The last student to find that object is out of the game. Remove another chair and go again until you have a winner. Make sure you have backpacks picked up and space for the students to run around safely.

- A planner
- A quarter
- Highlighter that is not yellow
- Water bottle with less than 5 stickers
