

San Antonio Math Include

Provide Greater Access to STEM Education to All Students

Jieon K.

**Tutor
San Antonio Math Include**

Jieon is part of the Class of 2025 at UC San Diego. She has a love for classical music, and she is the principal oboist of the San Antonio Youth Orchestra Symphony. Studying is great, but taking time off to play the oboe is a great way to lessen the stress that comes from school work and extracurricular activities. Speaking of extracurricular activities, she is a member of the Yearbook and Journalism clubs, Red Cross club, UIL club, and the BASIS Volleyball team. She is also the current NHS Secretary and the former NJHS Secretary. But perhaps, she is most proud to be an active volunteer in Children's Association for Maximum Potential, where they provide recreation and respite for the mentally and physically disabled. Indulging oneself in volunteer activities is as important as studying in terms of personal growth and enrichment. Although her passion more deeply lies in the fields of science, she does believe that math is an important subject that one must have a thorough understanding of in order to have a successful school career. I thus choose to help other students better perform in their math classes; not only does she tutor in SaMi, but she also tutors Pre-Cal to peers during school days and visits Calculus student support to help students prepare for their next exams. She sure hopes SaMi gives a chance for every young, ambitious child to excel in all future math courses and competitions.
