

Project Feedback

Due: November 26th (Sunday, midnight)

I assigned each tutor 2 drafts to review: [it is here](#). I tried to assign new projects for review and not your own. If I missed it, please let me know..

What to do: Create 2 separate google docs, write your feedback there and then add the link to each under your name. The spreadsheet I shared with you above has editing rights. Please be as detailed as possible. Students/tutors and instructors are going to use (or not :) these projects, so we want to make them as useful, readable, and appealing as possible.

What to keep in mind:

Clarity:

- Avoid ambiguity or vague language.
- Be specific about what aspects of the project you are referring to.

Positives and Negatives:

- Highlight both positive aspects and areas that need improvement. Acknowledge achievements, successful elements, or strong points of the project.

Constructive Criticism:

- If you identify areas for improvement, offer suggestions or solutions rather than just pointing out problems.

Relevance to Goals

- Evaluate the draft in relation to its goals and requirements. Does it meet the intended objectives?
- Comment on how well the project aligns with the initial scope and expectations.

Style and Readability:

- Refer to the lecture for the pointers. [Lecture 7](#)

Organization:

- Is the project well-organized? Does its purpose make sense?

Some questions to keep in mind:

- I am a student taking a class, and I am using this project (video, slides, etc.). Does it help me? What can be changed to improve it?
- I am a tutor teaching a class. Can I use this project to assist during my office hours? What can be changed to improve it?
- I was a student taking a class, and I used this project (video, slides, etc.). Would it have helped you? What can be changed to improve it?
