APPENDIX A: BOOKS FREQUENTLY CITED IN RESEARCH ARTICLES

Note: Chapters from books are often cited in articles published in research journals. Those chapters are included in the *Bibliography on Deafness*. However, the full contents of those books may be of interest to many readers. Below is a listing of the full contents of a selection of notable books in the field. When possible, authors and page numbers are listed for the book. ISBN numbers are also listed so that you can access the book on the internet or locate it for purchase. This is by no means a comprehensive list. The books were gleaned from entries contained in the *Bibliography on Deafness*. An abbreviated list of books containing only the publication information on the books is included in the bibliography. The full bibliography, along with this supplement, can be found on the DCD website: dcdcec.org. In some cases, the full

contents have not been displayed. This supplement of book chapters will be updated as new sources are identified.

Every effort has been made to include the full list of chapters in each book. In some cases, this was not possible. In the list below the /*/ symbol indicates those books with full listing of chapters; the /#/ indicates those books with only a partial list of chapters.
