

- **STRIKE SYSTEM:** if you don't join **at least one of the four projects** you will get a strike. Getting a second one means **kicking out of the studio**. Your strike disappears after joining **3 projects**.

- **WARNING SYSTEM:** before the strike you may also get a warning. You'll get one if

+ you didn't join 4 latest projects but you:

- are active in the chat,

- tried to take a part but for some good reason couldn't (we need to know about it though),

- made a dedication for the studio,

Generally, you're active as a member but you just don't join our projects. In this situation you'll get a warning. With a warning you're obliged to join **one of the two next projects**. If you do so, **your warning will disappear**, if you don't do it, **you'll get a strike**.

+ deadline passes and you don't reply to our reminders/comments/messages at all and we have no idea what is going on with your part. In this situation you'll also get a warning. This one disappears after **3 projects in which you took part** and it happens only if there wasn't problems with communication. If the situation repeats before you successfully take part in 3 projects you'll **get a strike**. You don't have to reply to every reminder (it'd be nice though) but just letting us know, even on a day of deadline, that you couldn't make it and need a replacement/more time would be enough. It isn't nice when projects keep on being late because some people just ignore us. We understand that life happens and sometimes you just have no other choice, that's why you only get a warning but if it repeats, it makes us feel ignored. It doesn't need a lot of time to just write it, so please let's respect each other.

- **REWARD SYSTEM:** if you're in **5 projects in a row** you can get a reward which is **choosing a theme and a song for the next small MEP!** Song cannot be longer than 2 minutes (which means you can just choose a specific part of the song)

- **GUEST AND MEMBERS:** guests can be a part of the skype group and they can also join some meps, but some projects (especially small ones, when we host two small MEPs at the same time) are members only. Guest can become a full member though, it depends on how dedicated to the studio they are.
