

Summer Heat

TPC Charters 2023 Summer Event

TPC Charters would like to announce the 2023 summer event, Summer Heat. This event will test the limits of your aircraft in the deserts of the southwest United States in the heat of summer where it can get to 110°F (43°C). You will visit airports in the deserts of Arizona, New Mexico, Utah, Nevada, and southern California. There will be a separate list of airports for general aviation/business jets and airliners. The event will run from Thursday, June 29 at 00:00z to Thursday, July 27 at 23:59z.

Summer Heat will be kicked off in partnership with Fly In Thursday on June 29 by the FIT event in Phoenix, AZ (KPHX). From there, the GA aircraft will spend time in Arizona and southern California. The airliners will have airports available throughout the southwest. Additional airports will be added in the third week of the event.

TPC points will be awarded for each airport visited during the event. Each pilot will receive 100 TPC points for the first time they complete a TPC Charters job to or from an airport. There will be a total of 27 airports to visit, 15 general aviation and 12 airliner airports, for a total of 2700 possible TPC points.

Event aircraft will not be ferried during this event. Pilots will be allowed an additional aircraft specifically for the Summer Heat event. They may also use their existing charters aircraft for the event. Your current aircraft can be ferried to the event, but TPC Charters management reserves the right to change out your aircraft if the ferry distance is too long. Once the event has started, any aircraft associated to the event will not be ferried. Your normally assigned aircraft that is not associated to the event will still be able to be ferried, but flights in aircraft not associated with the Summer Heat event will not count for Summer Heat TPC points. Also, aircraft associated to the event will not be changed during the event so plan accordingly.

Enjoy your time in the desert and make sure to stay hydrated!
