

Last updated: April 1, 2026

This Privacy Policy describes how your information is collected, used, and protected when you use the Pixel Island mobile application (the "App"). Your privacy is our top priority. The App is designed to process most sensitive data exclusively locally, directly on your device.

1. Locally Processed Data (Not Collected or Shared)

To provide its core features, Pixel Island requires certain special permissions. The data generated by these permissions never leaves your device and is not sent to our servers:

- **Notification Access (Notification Listener):** Used exclusively to read the metadata of the currently playing media (song title, artist, and album cover) to display them in the island interface and control playback. We do not read, save, or share the content of your personal messages.
- **Usage Stats and Packages (Usage Stats & Query All Packages):** Used in real-time to identify the foreground application and extract the colors of its icon in order to chromatically adapt the App's interface ("Chameleon Colors" feature). We do not track your browsing habits.
- **Camera:** Used solely to activate and manage the device's flash (Flashlight feature). The App does not take photos or record videos.
- **Call Management and Phone State:** Used to show incoming call notifications directly in the island and to allow you to answer or decline them. We do not record calls nor do we access your contacts or call history.
- **Bluetooth and Nearby Devices:** Used to detect the connection and disconnection of your earphones or Bluetooth devices to show animations and battery levels.

2. Automatically Collected Data (Third-Party Services)

In order to improve the App, monitor malfunctions, and understand how it is used, we integrate

tools provided by Google (Firebase). These tools may collect anonymized data:

- **Firebase Crashlytics:** Collects error logs and device information (model, operating system version) in the event of an abnormal App crash, to help us fix bugs.
- **Firebase Analytics:** Collects anonymous statistical data on the usage of App features (e.g., which widgets are activated most often) and aggregated demographic data.
- **Google Play Billing:** Securely manages in-app purchases and subscriptions. Payment information and credit cards are managed directly by Google; we do not have access to such sensitive data.

3. Data Security

We adopt industry-standard security measures to protect your information. Since almost all Pixel Island features operate offline and locally, the risk of data exposure is minimized. However, no method of transmission over the Internet or electronic storage is 100% secure, and we cannot guarantee its absolute security.

4. Children's Privacy

These Services do not address anyone under the age of 13. We do not knowingly collect personally identifiable information from children under 13. If we discover that a child under 13 has provided us with personal information, we immediately delete this from our servers.

5. Changes to This Policy

We may update our Privacy Policy from time to time. We advise you to review this page periodically for any changes. We will notify you of any changes by posting the new Privacy Policy on this page.

6. Contact Us

If you have any questions or suggestions about our Privacy Policy, do not hesitate to contact us:
