

## Site Observation Log

---

| DATE | OBSERVATION | LOCATION | INITIAL |
|------|-------------|----------|---------|
|      |             |          |         |
|      |             |          |         |
|      |             |          |         |
|      |             |          |         |
|      |             |          |         |
|      |             |          |         |
|      |             |          |         |
|      |             |          |         |
|      |             |          |         |
|      |             |          |         |
|      |             |          |         |
|      |             |          |         |
|      |             |          |         |
|      |             |          |         |

**Observations include:** pest/disease issues, any plant issues whatsoever, bed structural issues, general updates to be made, bloom times, plant growth, weather, floods/freezes, etc.

Record observations with description of location (if talking about specific plants list the location as well as crop and date sown info)
