

## Home Sweet Home

Verse 1 : Yesterday everything was picture perfect fine and, today the colors just bled out of the frame ,I tried to get them up, but they just fell through my hands like sand, dropping on the ground i can't stand that sound, ain't no miracle will heal the wounds

Refrain : Home sweet home what have we done to you for years, we can't undo  
so we have to find a way to raise the health bar up, that we can live here for years  
day after day it will be getting better

Verse 2 : Better prepare that the lights will go out, we don't need anything besides what we had found, in ourselves cause we can make it, again the world that we used to crowd, believe it or not, ain't no hero's coming to help us out

Refrain : Home sweet home what have we done to you for years, we can't undo  
so we have to find a way to raise the health bar up, that we can live here for years  
day after day it will be getting better

Ending : The spot is on , so let us lose no time, that the truth will have it very first prize,  
Folks can't wait any longer to move, on to the first strike that justice will be done,  
people don't forget
