

**Fake “Alien Abductions” Conducted by Shadow Government Para-Military
Operatives (MILABS)
by
Richard Boylan, Ph.D.**

It should be noted that virtually all of the lurid reports being palmed off on the public as examples of “alien misbehavior” are actually secret psychological warfare operations by human rogue military-intelligence units.

These renegade military-intelligence units kidnap civilians without legal authorization or justification. These units drug those they kidnap, (often experiencers). These renegades deliberately intimidate, interrogate, physically abuse, and even gang-rape the civilians they kidnap. These covert-operations military-intelligence units then use brainwashing techniques to make the civilians they kidnap forget about the military kidnapping, while the renegades hypnotically implant a false memory about the horrific experience as an alien abduction .

The Councillor For the Watchers, (a member of the High Council of the Star Nations), has passed on the information that the Cabal have appropriated advanced false-image technology, and applied it to their vile MILABS (faked alien abductions) purposes.

Originally, the U.S. military developed advanced holographic image-projection technology which permits them to create three-dimensional life-like images of, for example, rows of soldiers advancing forward for battle. These images are true-to-life, not like those cheesy holographic images in the earlier Star Wars movies, glowing with a bluish-white light. This new advanced technology allows the Army to create fake battalions on the march, for Saddam Hussein or whomever to waste their battalions and tank columns on responding to, while the real U.S. military are actually conducting battle somewhere else.

True to their duplicitous style, the Cabal let the U.S. taxpayer foot the enormous bill for DARPA (Defense Advanced Research Projects Agency) and the Department of Defense to develop this exotic, classified war technology. Then the Cabal stole this technology.

The Cabal have applied this technology to several dark purposes.

For one, the Cabal conduct psychological warfare operations on innocent civilians by projecting and having a realistic-looking 3-D fake extraterrestrial visit a human person. This image can be blended with psychotronic thought-projections into the head of the civilian victim, so she thinks the extraterrestrial is communicating with her. This visit is misused to give the victim menacing messages. And the Cabal can even beam false emotion-generating waves at the victim to make her think that the extraterrestrial is emitting cold or menacing vibes.

If an even more intense terrifying experience is desired, the Cabal can render the victim unconscious by either psychotronics or sleeper gas, etc.. And then Cabal special operatives invade her bedroom, haul her aboard one of the XH-75D Stealth

antigravity Shark helicopters, whisk her away to a secure (usually underground) facility, where she may be interrogated, threatened, abused, terrorized, gang-raped, drugged, and hypnotically programmed to mis-remember her ordeal as an alien abduction . She is then returned home to let the sleeper drug wear off. Voila Another duped victim of alien abductions to go around spreading the word of how terrible they are. This new unwitting propaganda "agent" costs the Cabal nothing more, and can mislead the public for years.

For additional impact, in their MILABS, Cabal operatives use high technology, including antigravity “tractor beams” (to draw persons up into disguised, silent, hovering antigravity helicopters masked as “UFOs”, which then take the victim to an installation made to seem like a UFO base, so that the victim will become confused and blame “the aliens” for Cabal kidnapping and abuse.

And in other operations Cabal operatives use this technology, plus hand-held lasers, to lift up livestock, core out the livestock’s organs, and drop them back on the pasture to create the negative propaganda impression that “heartless aliens” had been engaged in “cattle mutilations”.

The Cabal are working on perfecting this holographic technology further. This involves not only projecting high-grade 3-D holography but also the stimulation of particles in the area of the image to give weight or substance to the images being projected. This is extremely difficult technology, and the Cabal are stuck on this phase of development at the present, and trying to figure out how to do that.

There is yet another Cabal purpose. From revelations by the late rocket scientist Werner Von Braun, it appears that the Cabal wish to create 3-D holographic fake images of alien spacecraft which are solid enough to actually show up on radar and appear convincingly solid. Von Braun indicated that the Cabal plan to stage a fake alien invasion . This would undoubtedly involve myriad fake UFOs in the skies, potentially coupled with destructive energy rays hitting Earth targets. These energy blasts would actually originate from offensive weapons systems emplaced in orbit, and which the Cabal would control or commandeer.

It appears that the Cabal may be trying to imitate, and misuse, Star Visitor technology. The Councillor For the Watchers said that some of the Star Nations' starcraft utilize a much more advanced form of such technology to create false UFO images, which throw off missiles fired at them by the military or Cabal rogue units. While the missile is headed for the holographic UFO , the real starcraft can go to invisibility and escape. Once the real starcraft has made its exit, the illusory UFO is turned off and disappears from sight or radar screen.

It should be noticed that Star Visitors use such holography only as a defensive measure if attacked.

This is in sharp contrast to the Cabal, who use their primitive version of such technology offensively, to create fear, falsehood, terrorizing incidents, real victims of fake MILABS, and eventually, faked alien invasions .

The ultimate Cabal objective is to place Earth under martial law, with Cabal

operatives gaining power as the only ones who can save humanity , once they haul out of the closet their advanced energy weapons. These weapons systems are built from non-offensive scientific Star Visitor technology, stolen from government labs, and weaponized at Cabal labs.

But of course even such advanced Cabal weapons would be neutralized by the real Star Visitors, who have no intention of invading Earth, having watched nurturantly over us since before our inception as an intelligent species.

You are exhorted to spread awareness of the Cabal duplicity and treachery, which has wreaked much harm and disinformation amidst the UFO community. And which threatens to try to stampede humanity towards hysteria and a panic which can be manipulated to support literal Star Wars.

Forewarned is forearmed. And information is power.
