

Kiev, Ukraine - 14 August 2014

We are Conceptor – fast-growing European start-up based in Kyiv, Ukraine. Conceptor is a product development team that brings new technologies to the consumer electronics market.

We invented the iBLAZR LED flash for Smartphones and Tablets and Lunecase - an intelligent very unique case for smartphones that uses an electromagnetic field of a smartphone to power LED notification lights embedded into the case. The Lunecase project is going to unveil the totally new way to get the notifications on the smartphone.

Both iBlazr and Lunecase are successful Kickstarter projects, that had raised three times more than required goal.

iBlazr - <https://www.kickstarter.com/projects/iblazr/iblazr-the-led-flash-for-smartphones-and-tablets>

Lunecase - <https://www.kickstarter.com/projects/conceptor/lunecase-bring-the-back-of-your-iphone-to-life>

After a huge success we produced and shipped all the rewards to our iBlazr-backers without any delays.

IBLAZR - BETTER SOLUTION FOR YOUR IPHONE, IPAD AND ANDROID DEVICE
Named as “The Most Disruptive Tech” at CES 2014.

iBlazr is a world's first portable one-of-a-kind multifunctional tiny flash with 4 LEDs that can be synced with any iOS, Android and WP8 smartphones and tablets using the FREE companion app.

iBlazr is the only solution on the market for taking amazing photos in low-light situations which works great for doing selfies and provide a bright contrast light for digital cameras.

- Amazing for taking photos in low-light situations.
- Awesome for selfies
- Best compact lighting system for digital (DSLRs) / analogue cameras (using the cold shoe mount)
- Powerful light for various amount of scenes
- Has its own built-in battery and will not drain a smartphone's power
- Photo/video modes
- Can be used as an independent source of light (without connecting to a smartphone or other device)

Currently iBLAZR is available for sale in more than 15 countries through authorized dealers all over the world (including USA and Canada), via Amazon, and official web-site. And we keep covering new territories and reaching new horizons.

Reached milestones:

1. Funded on Kickstarter in September 2013.
2. Named as “The Most Disruptive Tech” at CES 2014.
3. Launched into retail in May 2014.

We keep inventing new products and embody new ideas.
