#### ABSTRACT

(Capital Letters, Centered, Upright, Times New Roman 11, Single Spacing)

This template is a guide format for writing articles on the Window of Health: Jurnal Kesehatan that has been adapted to the style of the WoH journal. The authors must follow the instructions given in this guide. This document can be used as a reference in writing your manuscript. Be sure not to change the style in this template, including font type and size, space size, indent distance, and so on. The maximum number of pages for a WoH journal is 13 pages. If there are foreign terms that have not been standardized, italic is written. Writing abstracts of up to 250 Indonesian words using Times New Roman 10 points, spacing 1. The abstract contains an introduction (1-2 sentences), research objectives (1 sentence), materials and methods (3-5 sentences), research results (3 -5 sentences), and conclusions (1 sentence) made in 1 (one) paragraph.

Keywords : Word 1; word 2; word 3; word 4; word 5

At least three words, maximum of 5 words (capital letters are only found in the first keyword, separated by point commas (;) and are not terminated on the last keyword)

## INTRODUCTION

### **(Capital Letters, Centered, Upright, Bold, Times New Roman 12, Spacing 1.5)**

The introduction contains the urgency and background of the research problem, which is described using the inverted pyramid method starting from the global, national, and local levels. Include references (relevant literature or research results) using the source number in each sentence after a period (.) which is adjusted to the Bibliography; for example, Mete HO et al., 2016 research on health education through mobile health can increase the knowledge of pregnant women regarding consumption of Fe tablets.<sup>1</sup>

The introduction contains a general background review and a literature review (state of the art); try to cover a minimum of 5 pieces of literature that can justify the novelty or uniqueness of this research compared to previous research (usually 2 to 3 paragraphs).

The number of pages in the introduction is 1-1.5 pages, written using Times New Roman 11-point (upright) format with 1.5 spacing. Each paragraph begins with an indent of 1 cm. The final part of the introduction should state the research objectives.

## METHOD

### **(Capital Letters, Centered, Upright, Bold, Times New Roman 12, Spacing 1.5)**

The method explains the types of research, including quantitative or qualitative research. Qualitative research, such as case studies, phenomenology, ethnography, etc., needs to add a description of checking the validity of the research results. Quantitative research explains the location and time of research, population and sample, sampling techniques, data collection techniques, data analysis, and data presentation. Research that uses tools and materials requires writing down the specifications of the tools and materials used. Writing uses Times New Roman 11 point (upright) with 1.5 spacing. Each paragraph begins with an indent of 1 cm and may not use the organization of writing into "sub-headings" in this section. Displayed in 1-2 paragraphs.

## RESULTS

### **(Capital Letters, Centered, Upright, Bold, Times New Roman 12, Spacing 1.5)**

The results section describes the characteristics of the research subjects, including univariate analysis, bivariate analysis, and multivariate analysis (if any). The results obtained from research must be supported by adequate data. The research results must be an answer related to the problem and research objectives stated previously in the introduction. Writing uses Times New Roman 11 point (upright) with 1.5 spacing. Each paragraph begins with an indent of 1 cm and may use organizational writing into sub-headings for each variable, as well as sub-headings in Bold and at the beginning of words using capital letters, CANNOT USE BULLETS OR NUMBERS. If you choose a table as a data presentation tool, please select an open table (only use horizontal lines), table position: middle, sentence position: middle, title position: top middle.

Table 1. Distribution of Malaria on Sulawesi Island

Location	n	%
Sulawesi Selatan	101	20.20
Sulawesi Barat	149	29.80
Sulawesi Utara	250	50.00
Total	500	100.00

If you choose images as a data presentation tool, such as diagrams, graphic images, photos, etc., Please select the JPG extension, image position: middle, title position: bottom middle. See the example below.

Figure 1. One of the Elements of the Denver Kit

## DISCUSSION

### **(Capital Letters, Centered, Upright, Bold, Times New Roman 12, Spacing 1.5)**

The discussion section contains reasons explaining the research results and other studies that support and are not in line with the results obtained. YOU ARE NOT ALLOWED to use sentences that are the same as those listed in the results section, nor are you allowed to re-read the tables and graphs of the analysis results. However, the results can be grouped for interpretation and discussion based on theory and previous research results. Writing uses Times New Roman 11 point (upright) with 1.5 spacing. Each paragraph begins with an indent of 1 cm, and organizational writing may be used in sub-headings for each variable. Sub-headings should be in bold, and use capital letters at the beginning of words. YOU CANNOT USE BULLETS OR NUMBERS.

## CONCLUSIONS AND RECOMMENDATIONS

### **(Capital Letters, Centered, Upright, Bold, Times New Roman 12, Spacing 1.5)**

The conclusion contains a summary of the results and a discussion concerning the research objectives. Suggestions are prepared based on the research findings that have been discussed. Conclusions should be answers to research questions and should not be expressed in statistical sentences. The presentation is in the form of flowing paragraphs that contain the connection between one content and another. Use terms that have substantive meaning in the field of science and avoid statistical/methodological technical terms. Suggestions may refer to practical action, the development of new theory, and/or further research. Write conclusions and suggestions using Times New Roman 11

point (upright) with 1.5 spacing. Each paragraph begins with an indent of 1 cm, and CANNOT USE BULLETS OR NUMBERS. Displayed in 1 paragraph.

### **ACKNOWLEDGEMENT (Optional)**

#### **(Capital Letters, Centered, Upright, Bold, Times New Roman 12, Spacing 1.5)**

If necessary, acknowledgment can be given to 1) parties who provide financial assistance and support, 2) support from departments and institutions, and 3) professionals who contributed to the preparation of the report. Write a thank you note using Times New Roman 11 point (upright) with 1.5 spacing. Each paragraph begins with an indent of 1 cm.

### **REFERENCES**

#### **(Capital Letters, Centered, Upright, Bold, Times New Roman 12, Spacing 1.5)**

**To maintain consistency in referencing, citing and writing bibliography, you are required to use standard reference applications such as Mendeley, Zotero, Bibtex or EndNote.**

The bibliography is written according to Vancouver writing rules. All references used in writing in the bibliography are numbered sequentially according to their appearance in the article, **NOT ALPHABETICALLY**. Only include used and relevant literature. **Reference sources use primary sources** that are original works, such as research articles in scientific journals, research reports or proceedings, articles in books from research results, historical sites, artifacts, etc.. **The comparison of primary sources is 80% compared to other sources from the total bibliography, which comes from publications in the last 5 years. Articles published in WoH journals are recommended for reference. The bibliography includes more than 10 sources.** Writing the bibliography uses Times New Roman 11 point (upright) with 1 spacing, space after paragraph 10 pt and before paragraph 0 pt. Each word in the title of a library resource begins with a capital letter.

10 pt dan before paragraph 0 pt. Tiap kata pada judul sumber pustaka diawali dengan huruf kapital.

**Addition :**

1. The manuscript must be a maximum of 13 pages with one point-five spacing, except for the title and abstract, using single spacing. The manuscript was written using the Microsoft Word computer program with an A4 page size. Moderate size margins. The contents of the article use a one-column format.
2. The margin or border of the writing from the edge of the paper is 2.5 cm on all four sides.
3. All scientific articles are checked for plagiarism using TURNITIN software after the journal has received a review from reviewers. The results of checking plagiarism via TURNITIN software are a maximum of 30%.

-----GOOD LUCK-----
