

These are just a few charts for the glazes that we will be using this year. I do have sample tiles in the room for you to look at as well. I do not have every color available, and there is always a really good chance that we will run out of a color before the semester ends. Feel free to look at the colors choices here while at home, so you can decide what colors you would like to use in the classroom.

Speedball Underglazes available:

The top left triangle shows the glaze with clear transparent glaze on top. The bottom right triangle shows the glaze without anything on top.

TEACHER'S PALETTE®

for painterly details

			
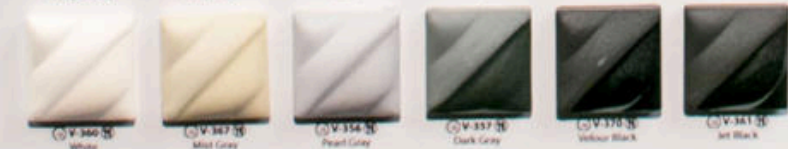

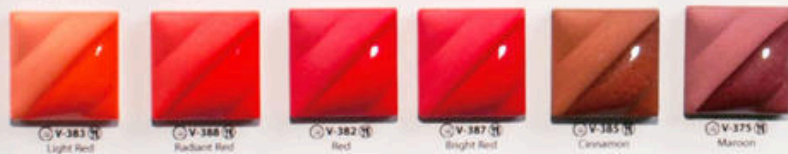

TP-60 Lemon	TP-62 Maize	TP-65 Pumpkin	TP-64 Carrot

TP-32 Fudge Brown	TP-11 Cotton	TP-15 Gray	TP-1 Coal Black

Velvet Underglazes

Extend Your Firing Range

"The colors are so intense that I can layer beautiful washes in a painterly manner."
Debra Fritts

"Season of Change" (2010)

Cone 05

LEAD FREE

Conforms to
ASTM D-4236

All AMACO® Glazes are properly labeled for safe use according to the guidelines established by the Art and Creative Materials Institute, Inc. (ACMI).

Use on wet, bone dry
or bisque fired clays.
One coat translucent,
three coats opaque.

Layer
Mixable

Dinnerware Safe

Tested fired on AMACO® No. 25 White Clay—half of each tile shown with AMACO® LG-10 Clear Glaze.

Only glazes marked with the spray symbol may be used for safe spray application. Refer to current jar for dinnerware safe status and safety labeling.

AMACO® underglazes have only been tested and approved as dinnerware safe when applied and fired under AMACO® LG-10 Clear Glaze. They should not be used alone on dinnerware surfaces.
