Voltacharger Unveils The World's Only 240W Universal 6-in-1 Magnetic Cable For ALL USB Devices —The Cable For Everything.

Gold Coast, AU – July 30th, 2024 Voltacharger, the leading provider of magnetic charging cables since 2017, has launched a Kickstarter campaign for the Volta Max, a revolutionary 6-in-1 universal charging cable. This campaign has gotten off to a phenomenal start,

surpassing its funding goal by 100% in under 3 minutes and reaching \$100,000 within the first 24 hours. As a significant upgrade to existing cables, the Volta Max boasts impressive features, including 240W Power Delivery, 4K display and video transmission with 20 Gbps transfer speed, and compatibility with Thunderbolt 3 and 4.

This timely charging solution was designed to address the deep-seated frustration many of us have experienced by repeatedly investing in easily broken charging accessories that promise the world and deliver little. These flashy, short-lived solutions leave us feeling frustrated, drained, and longing for something better. Big brands are often complicit in this cycle. They prioritize rapid development and fleeting trends over durability, quality, and genuine value. This approach leads to wasted resources, less productivity and brand mistrust.

What sets the volta max apart from other cables is its user focused design. A comprehensive charging solution designed with everyone in mind. Its signature smart E-mark chip magnetic 6-in-1 multi device compatibility saves you the hassle of looking for the right cable or port, backed up with a power delivery tech feature that allows it to deliver the exact amount of power needed for each device, eliminating the worries about its 240W charging speed.

The Volta Max cable boasts an impressive range of compatibility options, including 27W Apple Fast Charging, 55W, 100W, and more (see below). Its innovative design features magnetic connectors, which offer unmatched convenience and durability by reducing wear and tear on device ports. Additionally, the cable is equipped with 18K gold-plated pins, ensuring a stable and efficient current transfer. This means users can expect reliable performance and longevity from their investment, making the Volta Max a valuable addition to their daily lives

Downward Compatibility With 240W/140W/100W/55W/27W/12W

The Volta Max is also Thunderbolt compatible, unlocking a world of possibilities for streamlined productivity and enhanced performance. With the Volta Max Thunderbolt cable, you can connect to a docking station that effortlessly handles multiple peripherals, including monitors, keyboards, mice, and external storage, all while charging your laptop. Additionally, the Volta Max enables you to tap into the power of external graphics cards (eGPUs), revolutionizing graphics performance for gaming, video editing, and other demanding tasks. This means you can transform your laptop into a powerhouse workstation, tackling graphics-intensive projects with ease and speed. By harnessing the potential of Thunderbolt, the Volta Max becomes an indispensable tool for creatives, professionals, and gamers seeking to elevate their workflow and performance.

Our mission at Voltacharger, is to design durable, stylish, efficient and universal charging solutions that make peoples' lives better. Since 2017, we've been dedicated to perfecting magnetic charging cables. With over 200,000 satisfied customers, we've focused on creating long-term relationships rather than chasing quick profits. At Volta, your satisfaction is our top priority, and it shows in our commitment to exceptional service and quality. We are extremely excited about our upcoming Kickstarter campaign so we can provide you with a better charging experience.
