

SUPERCURRICULAR GEOGRAPHY - YEAR 7

P.D.ometer

Instructions

Fancy trying out one of the department's super curricular tasks to support your learning in geography?

Have a go and show this to your class teacher for more achievement points!

Extra Hot

1. Create an instruction manual for Year 6 students teaching them how to use/read an OS Map.
2. Create a video tutorial explaining the different features that can be found on map and their meaning.
3. Create a contour model showing contour lines, colour shading and a spot height.
4. Research and create a fact file/presentation/ video about an extreme weather extreme which has been in the news over the last year!
5. Complete a book from the reading section below and write a summary/blurb about this.

Hot

1. Create a detailed map of the UK highlighting key tourist hotspots. The tourist sights should be displayed by an image and there should be a key along side your diagrams.
2. Research a geography career linked to your topic and create a fact file/ presentation about this.
3. Research and explain how the melting of Arctic ice caps via global warming may affect the future weather of the UK.
4. Create/design a map of a theme park using symbols to show key locations. A key must be included.
5. Write short story about your favourite place in the UK using geographical words.
