Mr. Costa Macedo and Mr. Venancio Deslandes, both with a title of General, allowed the journalist to interview the witnesses who had an encounter with a UFO.

Capt. Lemos Ferreira was leading a squadron of F-84G airplanes along with three other pilots, Mr. Manuel C.N. Marcelino, Mr. Alberto A.P. Covas and Mr. Salvador A. Oliveira. They were on a training flight at 25,000 feet when the Capt. noticed the presence of a round light source with unusual features. All the pilots were surprised by such brightness, and, the fact that its central part changed color from green to red. As they kept flying they observed the object changing its shape from circular to oval. At the same time it lost brightness and became an object of larger dimension. Then, another circle appeared to drop two luminous circles of red light. Suddenly all the objects, the oval one followed by four circles of light, started flying toward the airplanes and at an incredible speed they passed behind and under them, confusing the pilots.

The Meteorological Observatory of Coimbra registred an extraordinary magnetic field fluctuation at that time.

People who work in the airport noticed the presence of two bright objects in the sky that were making odd patterns. Despite the fact that they used binoculars it was not possible to identify the objects. A small airplane from the Aeroclub of Oporto, piloted by the instructor Mr. Adelio Fernandes, took off in order to have a closer observation of the objects. At 1200 meters high he saw them manoeuvre without any conclusion. A request was made to the Airforce base of OTA but no airplane was flying in the area.

The director of the Institute of Geophysics of Coimbra, Professor Jose Custodio de Morais, informed the "Diario de Coimbra" newspaper that an unidentified flying object was detected by this Institute. It was close to the mountain of Lousa, in S.E. direction at a latitude of 30 degrees. It was moving with an apparent slow motion because it was visible till midnight. It was extremely bright, more than planet Venus and scintillated strongly, radiating various colors from red to blue. Due to its brightness it was hard to observe it through a small telescope.

The witnesses were flying in an airplane of the Portuguese Airways Company (TAP), a "Boeing 707", from Lisbon to Cabo Verde and Las Palmas.

Over the Portuguese coast (Sagres), the cmdt. Rodrigo Freitas was alerted by the flight mechanic technician, Francisco Duarte, because of the existence of a few strange lights in front of them.

Mr. Freitas said that there was a formation of five lights or objects who formed a central block. Two of the lights were spinning.

The phenomenon left a trail behind. The event took place 80 miles away of the airplane. At that point the Boeing was flying at a speed of 900 Km/H and was 19000 ft above ground. The objects, or lights, were reported to be 16000 ft higher. They tried to find out if somebody else from another airplane had seen the phenomenon and they got the information that another crew from a South African Airways airplane had observed the same event 40 minutes before. Knowing the other airplane's position, Mr. Rodrigo Freitas calculated that the phenomenon had moved at a speed of 36000 Km/H. Later, Mr. Freitas made a report which was sent to NASA in the U.S.A., as was usual in this kind of observation.

Strange manoeuvres executed by ufos were observed by the crew of a Boeing 707, two workers from the Control Tower at the airport, a worker in the hotel of Acoteias (Algarve), and several unnamed people all over the country.

The ufo was said to be a main body extremely bright and blue, surrounded by other horizontal red or white lights. These were five to seven in number.

Then, these lights separated from the central body and exploded followed by an enormous flash of light.

Meanwhile, an airplane from the Portuguese Airways (TAP) that was flying to South Africa almost hit the ufo which avoided it by changing direction.

Two workers from the control tower at the airport observed the same phenomenon with surprise. One of them who saw the object with binoculars said it took off with a speed three times faster than a jet aircraft.

The "National Enquirer" dated on November 30, 1976, published the following data about the case:

"707 passenger jet on collision course with dazzling UFO"

The dazzling ufo and the Boeing 707 jetliner carrying 101 passengers raced toward each other on a collision course. "We're going to crash!" thought co-pilot Armindo Pinto as he wrenched the plane into a steep bank.

Startled by the violent manoeuvre, capt. Eloy Weigert, who was checking instruments, looked up in time to see the ufo dead ahead. It was so close it seemed to fill three quarters of the cockpit windshield.

Spitting out what appeared to be fire and sparks in bursts it shot past the portuguese airliner. Observed by two other, astonished crewmen and an air traffic controller on the ground, the extraordinary encounter occurred shortly after TAP flight 241 took off from Lisbon airport at 2:10 AM local time on September 19, bound for Africa. TAP is a government-run airline. In their seats in the cockpit were captain Weigert, 52, with 22,000 hours of flying time, co-pilot Pinto, 34, flight engineer, Gilberto Sarmento, 48, and Jose Pinto, 31, co-pilot for a second crew that would take over the plane in Kinshasa, Zaire. He was the first to spot the ufo.

"We were climbing to 4,000 feet", he told the "Enquirer". "I was sitting behind the capt. on the left hand side of the flight deck and just before we reached 4,000 feet I saw, through the first officer's window on the right hand side off our wing, coming in our direction, giving off flashes", Costa, 59, continued: "I saw this flying object expel

"We were climbing and converging with it. As we banked, it passed to the left and slightly below us. Because of the angles, and the location of the passengers, it was impossible for them to see. The front of the aircraft was being used for cargo, and the passengers were in the rear".

The ufo was traveling from west to east. Moments after flight 241 encountered the object, another portuguese 707, some 600 miles to east reported

a strange sighting.

Manuel Aleixo,31,co-pilot of TAP flight 130,flying at 33,000 feet,told the "Enquirer":"At about 2:15 AM we saw a very bright light moving very fast below us.It was traveling from west to east and disappeared in about 45 seconds.It didn't look like any aircraft or a meteor.We didn't know about capt. Weigert's sighting,but we were joking on the flight deck about having seen a ufo".

Two pilots from different airlines observed two large ufo's as big as a navy ship,when they were flying over Faro.Denis Wood,british cmdt.,who has been flying for the last 20 years,said that the objects were seen by the crew and the radar station from lisbon.The ufo's were reported to be sausage-shaped, bright and carried some kind of mirror in the center.At least,that was the description made by a witness who observed the phenomenon through binoculars.The british pilot got a warning from the radar station in Lisbon,telling him about the presence of two ufo's over the portuguese territory.These objects werereported to be 10 Km away from the airplane.

Antonio Carvalheira,portuguese pilot,who observed the same phenomenon for eight minutes,said that such manoeuvres executed by the ufo's could not

be done by anyterrestrial aircraft.No one took pictures of the ufo's.

The "Natal Daily News" from South Africa,published an article titled "UFOs as big as battleships,pilots claim".For fear of being ridiculed,pilots of three airliners kept secret the sighting of three ufo's over Portugal,later described by one of them "as big and solid as battleships".

British Airways Trident jet pilot,captain Dennis Wood,who has been flying with the airline for 20 years,said he and his crew first spotted the ufo's while flying from London to Faro,in the A
The sighting,described by experts as the most important in the past decade,was also made by the crew of a british Tristar below the Trident and the pilot of a portuguese airliner.All the stories tallied.

Captain Wood,42,said he and the Tri-star crew made sighting reports when they arrived at London's Heathrow airport but kept it all a secret for fear of being ridiculed.Captain Wood has come forward in the hope that Britain's ufo experts will turn a serious eye to this particular sighting.

"Suggestions that the three objects were balloons,stars or satellites,strange clouds or reflections are quite unacceptable to us",he said."As I looked to the west we saw this very bright headlamp in the sky.All the cabin staff saw ittoo and I told the passengers.Then it was joined by two cigar-shaped objects as big and solid as battleships".

On the return trip captain Wood tilted his radar scanner."There,in exactly the same spot were these two cigar-shaped things.We got to within seven miles ofthem when they disappeared from our screen".

The official inquiry was conducted by the representative of the Portuguese government, Lt. Henrique da Costa Pessca, Commander of the Santa Maria Airport facility. The information contained in Lt. Pessca's report was made available to Wing Intelligence Officer Robert D. Gammell, 1st Lieutenant, USAF, head of the US Intelligence Operations at the Azores Air Transport Station in Lajes Field. Lt. Gammell prepared and submitted his report to Air Force Intelligence in accordance with the official UFO reporting format, AFR 200-2, the procedure used from 1953 through 1966, when it was revised for use in conjunction with the Condon Committee inquiry.

The shape of the object was reported to be oblong, 10 feet in length by 5 feet in height, and of a light metallic blue in color. There was a plexiglass-type section in the forward end, also blue, which contained the "pilot". There were four pole-like appendages, two at each end, which supported parallel aerials, and there was an orange light in the nose of the object.

The civilian guard, Mr. Monteiro, was alerted to the presence of the object by a humming or whirring noise, similar to the sound made by the wind passing over wire cables or telephone lines. The object approached and landed approximately 30 feet from the guard post, making a slight nose-down approach to land; it levelled off, hovered a few feet above the ground. The witness was unable to see any landing gear. A blond-haired man, 5 feet, 10 inches in height, got out of a door located in the plexiglass section; he approached the witness, but "attempts to converse failed". The contact lasted from 2 to 3 minutes and was terminated by the approach of an automobile. After the pilot

reboarded and "belted up",the UFO ascended almost vertically and then accelerated rapidly into the night sky,disappearing in the darkness.

The weather,according to the witness,was fair,with visibility unlimited.The official weather conditions for Terceira Island (142 nautical miles to the northwest of Santa Maria Island) reported the ceiling at 200 feet,with a one/eighth cloud cover at that altitude.The wind direction was 230 degrees at 14 knots,at 6,000 feet.There were no balloon launchings in that area at the time.

Two objects with a disc shape were observed over the city.They were grey with darker color on the edges.One of them executed several movements,stopping and changing directions at high speed.

At that point several people,including teachers from the Secondary School "Escola Comercial e Industrial de Evora",observed the falling of a strange white substance,(angel hair).

This phenomenon took place over a four hour period.Samples were taken and examined.It was then possible to observe a strange being with central round body.Ten arms in perfect symmetry were radiated from it.This observation happened while making some tests with the substance.

Scientific

Conclusions:

During the First Iberic UFO Symposium in Oporto, October 7 & 8, 1978, and for the first time since 1959, the reports made by the teachers were released and discussed. At the time, and with a total agreement of the participants on the symposium, the ordinary " Angels Hair " became named "Fibralvis", a word composed from the Latin "Fibra" (Fiber) plus "Alvis" (Alvine), then adapted to Portuguese as "Fibralvina".

Material deductions:

The substance looks like flax which is linked by white filaments arranged in a random pattern.

The filaments are from a natural source and not artificial fibers. They form some kind of felt with wave shaped fibers, sometimes with nodosity. Physical action is the only way to separate them. Compared with cotton it is much thinner.

The substance is a vegetable product and not animal. Its combustion is fast and leaves a very tiny residuum of white ashes. The organism found in the experiments is entirely connected to the UFO phenomenon.

This subject was presented for debate, by Mr. Joaquim Fernandes, Director of CEAFI at the time, as a team effort by his group.

Mr. Pavao is a farmer. He was aged 55 at the time of the encounter and deserves credibility.

Everything started on a sunny morning, as usual, Mr. Pavao left his place taking his sheep to the fields. Then, at about 11:00 hours, he heard a noise. At the same time his dog panicked, which made Mr. Pavao feel that something wrong was happening behind him. Then, he turned back as fast as he could and, to his surprise, two 8 ft tall humanoids were standing there, close and staring at him continuously.

Extremely tall and strong they were dressed with a complete grey suit. Their faces, without protection, were close to the human's. Only the eyes and skin were different. Their hands were hairy and quite big.

Then the strange beings got closer to the witness and seeming friendly they touched his left shoulder and several other parts of his body. At the same time, they spoke a strange language with a modulation like the human's voice. At this point the witness was able to see that they had teeth, due to the movement of their lips.

Seeming to understand the fear of the witness, one of the beings pointed to the sheep, and, Mr. Pavao told him the name of the cattle. Meanwhile, the two beings kept talking and laughing. Then, Mr. Pavao gave an order to his dog, for it to get one of the sheep and for a second he looked for the beings to disappear. When he looked back to the place where they were, all he could see was an intense flash of light which blinded him for a few seconds. After that everything became normal again.

It was like a dream. Extremely nervous and excited he returned home where his wife and son were surprised by the way he looked.

This event became the subject of his nightmares for several nights. Mr. Pavao can identify several languages and, says that the one spoken by the beings wasn't from Earth.

Materialization? Unfortunately at the time of the investigation there were no traces on the place.

2-Before the "Miracle":

50 000 people wanted to witness the event,announced three months before by the entity to the three children.

Journalists,teachers,workers,priests,farmers,children,sick

people,etc.,etc.,all them,observed the "dark cloud" coming closer to the usual place.By this,some people started praying.

By 13:47 hours rain had gone and the sun was visible for a while.

Another small white smoke cloud appeared over the oak tree while the first one was still visible in the sky.

Meanwhile,Lucia kept talking with the entity and,as the dark cloud moved,a silver "globe" was uncovered.At the end of the dialogue the entity pointed her finger to the place where the sun was,as if she was pretending to make a sign to the silver "globe",and left.

3-Description of the phenomenon:

When the entity left,the clouds opened and a bright silver disk appeared,spinning and shining as if it was the sun.At this point the "miracle" was done.It stayed like that for 8 to 10 minutes and then became dark.Then,for unknown reason,the disk looked as if it would crash,which

caused a sensation of fear among the crowd. It took off with irregular movement.

A. Ribera's investigation concluded that the crowd that stood in a field at Fatima, a small village in the district of Leiria, some 62 miles north of Lisbon, on October 13, 1917, was waiting there for a miracle, because three children had been assured such an event would take place after a number of meetings with an "Entity" that came from the sky in a globe of light.

The witnesses were shepherds: Lucia, aged 10, and her cousins Francisco Marto and Jacinta Marto, aged 9 and 7.

Among the crowd was Professor Almeida Garrett, of Coimbra University, a scientist, who described the phenomenon in the following terms:

"It was raining hard, and the rain trickled down everyone's clothes. Suddenly, the sun shone through the dense cloud which covered

it. Everybody looked in its direction. It was not dazzling. I don't think that it could be compared to a dull silver disc, as someone said later in Fatima. "No. It rather possessed a clear, changing brightness, which one could compare to a pearl. It looked like a polished wheel. This is not poetry. My eyes have seen it. This clear shaped disc suddenly began turning. It rotated with increasing speed".

There were a few thousand people that could see the "sphere of light" used by the entity to go to the place of the meeting. According to the very words of the Reverend General Vicar of Leiria, who was one of the witnesses, the entity came in an "aeroplane of light", an "immense globe, flying westwards, at moderate speed. It radiated a very bright light. "

Some other witnesses saw a white being coming out of the globe, which several minutes later took off, disappearing in the direction of the sun.

Like the previous three other observations, the phenomenon proceeded in the same way.

Data concerning the physical aspects involving the observation of the

entity:

- Lightning and thunder before the contact
- Noise like "thousands of bees" while the entity spoke to the three children
- Strange white smoke cloud over the tree where the entity appeared
- Several colorful clouds in the sky
- Daylight became darker than usual
- Temperature went down
- A quite pleasant smell
- Several objects were seen inside the clouds
- Classical type of UFO (DD)
- Strange small balls over the tree
- The entity was moved over "stairs of light" which,would involve the whole area where the children were,including the tree
- Wind and dust were normally felt
- Observation of falling angel hair
- Tranquilizing effect on the sheep

Three children were collecting their sheep about noon when they saw a flash in the sky. Later, a white bright figure appeared near a tree.

DATA ABOUT THE ENTITY:

- Seemed to be a beautiful female entity.
- Was surrounded by a powerful bright light.
- Appeared to be 12 to 15 years old.

- Was about 4 ft tall.
- Was wearing a tight skirt,a coat and a cloak.
- Her head was covered by "something" hiding the ears and hair.
- Her eyes were dark.
- Was carrying a "string of beads" around her neck and a ball of light at the waist level.
- Appeared to come from the sky and " vanished by stages".
- Did not execute any facial movements.
- Her feet did not move while "walking".
- Spoke without moving the lips.
- Moved her hands briefly.
- Turned back to the witnesses when leaving.
- The contact lasted 20 minutes.
- It was "said" by the entity that contacts would be made every month on the same day 13,and,at the end of the sixth one she would tell the witnesses who she was and where she came from.
