Che Community Meeting

8:00 AM PST, November 26th, 2018

Call In Details

Topics

#	Topic	Name
1	Eclipse Cloud Development Tools Working Group	Dave
2	CheConf 2018.2	Dave
3	Calling for blog post about Che 7	Stevan

Attendees:

-

Notes

Topic1: Eclipse Cloud Development Tools Working Group

- Draft for the working group proposal
  - https://docs.google.com/document/d/1Uygw254YUiSqjN5IaLLXK4hiIN5pY-wrQkOag5fDk8I/edit#heading=h.hl5imr2gjdaz
- Scope:
  - Define standard protocol for:
    - Workspaces API
    - Preferences API
    - Files API
    - Which could be reused across different IDE clients
    - (like a protocol for LSP)
  - What is the Cloud IDE
    - Don't limit the cloud aspect - you could still be running those tools locally.
    - Performance, Scalability, power and more resources for tools running in the cloud
- Funding:

        - Do we need money? What would we spend money on?
        - Member & outreach activities - workshops, virtual conferences, member meetings
        - Marketing activities - promoting Eclipse for cloud development
        - Perhaps compare funding membership costs across Eclipse WGs and various Linux Foundation, OpenStack, open infrastructure initiatives
        - Expectation is that there would be some useful marketing activities around the working group, and that members will talk about their involvement
- Members:
    - Eclipse Che members:
        - Red Hat
        - SAP
        - Software AG
        - Progress
        - Broadcom
        - CloudToGo
    - Eclipse Theia participant companies
        - Ericsson
        - Typefox
        - IBM
    - ECD member companies
        - Pivotal
        - EclipseSource
    - Traditional IDEs
        - IntelliJ
        - Apple
        - Microsoft
    - Start-ups or dev related projects
        - Solo.io
        - Ballerina
        - Need to include broad spectrum of project vendors
- Top priorities:
    1. Creation of a mailing list to discuss the creation of the working group
    2. Updated WG charter draft with feedback
    3. Member recruitment (see list above)
    4. Start discussion on membership fees and classes, and define initial budget for expenditures
    5. Start collecting membership agreements

Topic2: CheConf 18.2

- Agenda has been published on https://www.eclipse.org/che/checonf18.2/sessions.html
- Feel free to share and tweet about it

-

Topic3: Blog post about Che 7

- If you would like to share your early feedbacks and feelings on how Che 7 is looking, or what is your favorite new capability provided by Eclipse Che 7, please contact slemeur@redhat.com
- Will raise that to che-dev
-
