Brief summary/ Description of source;-

A slide show presentation on the different shot types used when filming.

Brief summary of what I Have learned;-

From this presentation I have learned that there are many different shots I could use for my music video rather than just used standard mid- shot or long- shot, allowing my music video to be more diverse.

Reliability of the source;-

This source could not be considered reliable as another student completed the presentation, however, the definitions of the shot types are accurate and correct and so I will use this to guide me when filming.

Where next?;

I aim to begin researching into storyboards in order to have a greater picture of how my finished product will look.
