

Natural Systems Are All Around You!

Take a picture of an animal you see in your everyday life, or bring in a piece of a plant - enough to be able to identify it! (Please make sure you are allowed to remove the plant from where it is growing, and that the plant is safe to touch). Once you have the picture or plant at school, answer the questions below.

1. Can you identify the specimen? Write the name below.
2. What parts of its ecosystem or environment do you think the specimen relies on to survive?
3. Do you think any plants or animals rely on your specimen to survive?
