11. MyEd GB - LSS & International Teachers

LSS and International Teachers should have “School View”. If you do not, please complete the FIPPA training after viewing the Orientation Videos for MyEd. Click here.

If teachers in your school are using the MyEd Competency-based Gradebook, you will be able to view your students’ academic progress. Bear in mind that teachers do not generally post grades every day. Some may only post monthly. If the teacher is using Google Classroom, for example, you might want to log on with the student and have them show you their T0-Do work.

To view a Student’s progress:

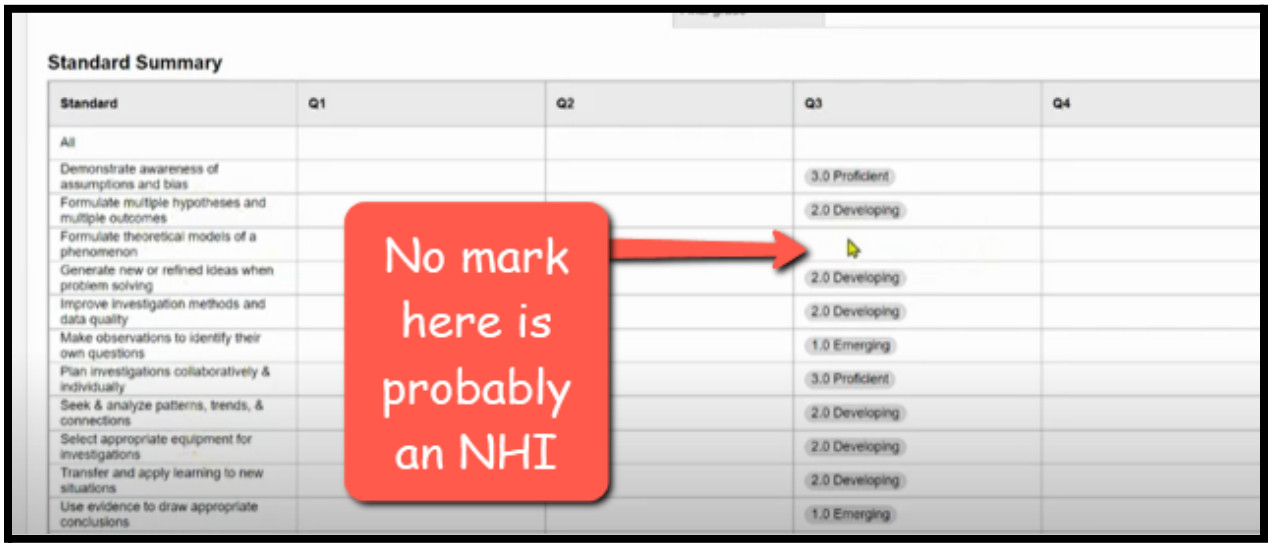

1. Log on with School View
2. Select the STUDENTS top tab - choose your group in the Filter or type the name
3. Select the Academics side tab
4. You will see, at a glance, the Trend score for all the competencies that are being assessed in that course.

5. Take a closer look by clicking on a course:

NHI:

When students log on, they will be able to go to Academics top tab, click on a course, choose Assignments side tab and view individual assignments within a course:
