

Individual Planning Policy

We believe in the value of inclusion. Being an inclusive centre in which all children and families are welcome offers countless benefits for everyone. Children with extra support needs participate in every aspect of our child care program according to their ability. We individualize programs in consultation with families and professionals such as Speech and Language Pathologists, Occupational Therapists, Physiotherapists, Psychologists and Supported Child Development Program Consultants. Staff will work cooperatively with others to meet each child's specific needs for growth and development. A written Individual Plan will outline the child's strengths and needs, specific goals and timelines and the supports needed to implement those goals.
