Abstract (10 pt)

The Abstract has a maximum of 250 words; No citation; State in the abstract a primary objective, research design, methodology, main outcomes, results, and conclusions.

Keywords:

First keyword; second keyword;

third keyword; fourth keyword;

fifth keyword

This is an open access article under the [CC-BY-SA](#) license.

INTRODUCTION (11pt)

The introduction should set the study in context by briefly reviewing relevant knowledge of the subject; follow this with a concise statement of the objectives of the study. All standard paper components have been specified for three reasons: (1) ease of use when formatting individual papers, (2) automatic compliance to electronic requirements that facilitate the concurrent or later production of electronic products, and (3) conformity of style throughout a conference proceeding.

The paper is written in English. The length of the submitted paper is at least 10 pages and no more than 15 pages. Use a tool such as Mendeley, Zotero, or EndNote for reference management and formatting, and choose the IEEE style.

METHODS (11pt)

The introduction explains the background of the problem, the study of literature and research purposes. Some initial introduction paragraphs explain the problem and background to these problems [1]. The next few paragraphs explain the study of literature that contains recent knowledge development which is directly related to the issues. The last paragraph of the introductory section contains a description of the purposes of the study. A brief description of the methods/techniques used (the principles of these methods should not be described if readers can be directed to easily accessible references or standard texts). The article must be original. The submission has not been previously published, nor is it before another journal for consideration (or an explanation has been provided in Comments to the Editor). The submission file is in Microsoft Word document file format. The text is 1,15 spaced; uses an 11-point font; employs italics, rather than underlining (except with URL addresses); and all illustrations, figures, and tables are placed within the text at the appropriate points. The text adheres to the stylistic and bibliographic requirements outlined in the Author Guidelines, which are found in About the Journal.

RESULT AND DISCUSSION (11pt)

A clear presentation of experimental results obtained, highlighting any trends or points of interest. The results should not be repeated in both tables and figures. The discussion should relate to the significance of the observations. The content must be arranged in the following format if it contains sub-chapters.

Sub-Chapter

Write an explanation regarding the contents of sub-chapter here according to the format provided

Sub-Sub-Chapter

Write an explanation regarding the contents of sub-sub-chapter here according to the format provided.

Equations

The equations are an exception to the prescribed specifications of this template. You will need to determine whether or not your equation should be typed using either Times New Roman or the Symbol font (please no other font). To create multilevel equations, it may be necessary to treat the equation as a graphic and insert it into the text after your paper is styled.

Number equations consecutively. Equation numbers, within parentheses, are to position flush right, as in (1), using a right tab stop. You may use the solidus (/), the exp function, or appropriate exponents to make your equations more compact. Italicize Roman symbols for quantities and variables, but not Greek symbols. Use a long dash rather than a hyphen for a minus sign. Punctuate equations with commas or periods when they are part of a sentence, as in:

$$a = b + c \quad (1)$$

Note that the equation is centered using a center tab stop. Be sure that the symbols in your equation have been defined before or immediately following the equation. Use “(1)”, not “Eq. (1)” or “equation (1)”, except at the beginning of a sentence: “Equation (1) is . . .”

Figures and Tables

Place figures and tables at the top and bottom of columns (if possible). Avoid placing them in the middle of columns. Large figures and tables may span across both columns. Figure captions should be below the figures; table heads should appear above the tables. Insert figures and tables after they are cited in the text. Use the abbreviation “Figure 1”, even at the beginning of a sentence.

Table 1. Likert Score

No.	Scale	Score
1.	SS	4
2.	S	3
3.	TS	2
4.	STS	1

Positioning Figures and Tables: Place figures and tables at the top and bottom of columns. Avoid placing them in the middle of columns. Large figures and tables may span across both columns. Figure captions should be below the figures; table heads should appear above the tables. Insert figures and tables after they are cited in the text. Use the abbreviation “Figure 1”, even at the beginning of a sentence.

Figure 1. CV husein Ar Rauf Logo

Figures should be in high resolution and well contrast in JPEG or PDF with the following conditions:

- Image (line art), figures, and diagram (solid/no shades of gray) with minimal resolution 1000-1200 dpi (dot per inch).
- Combination Halftone, combine figure and text (image containing text) and coloured graphic or in grayscale format. Resolution 600-900 dpi.
- Figures title typed clearly below the figure.
- Figure with pointing arrow should be grouped (grouping).
- Legend or figure description should be clear and complete. If compressed, the figure should be readable.
- Statistic graphic should be supplemented with data sources.
- If the figures come from the third party, it should have the copyright transfer from the sources.

CONCLUSION (11pt)

A brief explanation of the significance and implications of the work reported.

ACKNOWLEDGMENT (11pt)

Optional property

REFERENCES (11pt)

References in each article cited must include a DOI. Expect a minimum of 25 references primarily with a minimum of 70% to journal papers with DOI. Make sure that the total number of references over 5 years is a maximum of 5%. Use the "Insert Citation" button to add citations to this document. Please use the IEEE citation style and use references manager (such as Mendeley or Zotero).

The template will number citations consecutively within brackets [1] The sentence punctuation follows the bracket [2]. Refer simply to the reference number, as in [3] — **do not use** “Ref. [3]” or “reference [3]” **except at the beginning of a sentence**: “Reference [3] was the first ...”. References are written in 10pt font size
