

Last updated [June 12, 2018]

We respect the privacy of our users. And here is why the app needs multiple permissions.

Requested permission	Why this required?
Access Account	To send push notification to unique users
Location/GPS	To find a nearest police station/hospital/fire service
Direct call	To allow user to initiate a call during emergency
Send and view SMS	We don't read user's personal message. However, user can send SMS from the app to their friends and relatives.
Read SD card	We store all our database in SD card.
