

World Sweeper Press Kit Overview

Updated: 2026-05-06

Service Overview

World Sweeper is a browser game where multiple players gradually clear a giant map together. It combines cooperative progress with light area competition, because players first claim a zone and then solve it.

Key Features

- Map silhouettes and region shapes become playable boards.
- Multiple players can work through the same world in real time.
- Claimed areas create readable tension without turning the whole game into a direct versus mode.
- Cleared zones remain visible, making the game interesting to watch.

Fact Sheet

- Service name: World Sweeper
- URL: <https://world-sweeper.web.app/>
- Genre: Online cooperative Minesweeper / map puzzle
- Status: Live
- Platform: Web browser on desktop and mobile
- Price: Free
- Login: Anonymous play available, optional Google linking
- Contact: X @divideby_zero

Suggested Q&A

Why use maps?

Because puzzle progress becomes visible as scenery. Solved territory leaves a readable mark on the world itself.

Is it cooperative or competitive?

Primarily cooperative, with just enough area-claiming tension to create competition.

Do players need accounts?

No. Players can start anonymously and link Google later only if they want persistence.
