

## Was vaccine testing rushed?

- 00:07 These vaccines went through the same steps that all vaccines and drugs go through
- 00:12 to be approved for use in the United States. The steps were faster because of that large
- 00:18 federal investment in the production of these vaccines and removal of some of the barriers
- 00:22 the bureaucratic and red tape barriers that are sometimes involved in these processes
- 00:26 but these vaccines were studied in trials of tens of thousands of individuals to look at
- 00:31 both how effective they are at preventing COVID-19 as well as how safe they are
