ABSTRACT

The abstract word count should not be more than 300 words and should be typed using Times New Roman, font size 9. Please format your abstract using the 'Abstract' style in the Styles Gallery.

The **line numbers** on the left allow easier referencing and communication between the author and reviewers during double-blind peer review. Please **do not remove** the line numbers.

Please **do not edit or remove** any texts or objects highlighted in red colour.

Please **read the content of this guideline entirely**. Failure to adhere to this guideline shall lead to manuscript rejection at the desk evaluation stage.

Introduction

The manuscript should be prepared using Microsoft® Word and it must not exceed 20 pages, including tables, figures and a list of references. The text should be typed within a print area with margins similar to this template, left and right: 2.1 cm each; top: 1.33 cm, and bottom: 2.5 cm.

The body of the manuscript should be typed in single-column and single space. The title should be in capital each word and centered across the page. It should be typed using 17 pt Times New Roman font.

The paper should include names and affiliations of all authors. Please format the author and affiliation using the 'Author' and 'Affiliation' style, respectivley in the Styles Gallery. The authors' name should be typed in Times New Roman and font size 13. The authors' affiliation should be typed in Times New Roman, font size 8 in italic font and the corresponding author's email should be typed in Times New Roman and font size 8 at the bottom of first page. The section headings are arranged by numbers, bold and 10 pt. Here are further instructions for authors.

Structure of MS Word Formatting

Files should be in MS Word format only and should be formatted for direct printing. Figures and tables should be embedded and not supplied separately. Please make sure you use normal fonts in your documents as much as possible. Special fonts, such as fonts used in the Far East (Japanese, Chinese, Korean, etc.) may cause problems during processing. To avoid unnecessary errors, you are strongly advised to use the 'spellchecker' function in MS Word. Follow this order when typing manuscripts: Title, Authors, Affiliations, Abstract, Keywords, Main text (including figures and tables), Acknowledgements, References, Appendix. Collate acknowledgements in a separate section at the end of the article, and do not include them on the title page, as a footnote to the title or otherwise.

Bulleted lists may be included and should look like this:

(i) First point

(ii) Second point

(iii) And so on

When you have completed your bulleted list, ensure that you return to the 'Main Text' style, which you will mainly use for large blocks of text.

Please do not alter the formatting and style layouts set up in this template document. The template indicates that papers should be prepared in single-column format with size 192 x 262 mm. Do not number pages on the front; page numbers will be added separately for the preprints and the Proceedings. Leave a line clear between paragraphs. This document provides all the required style templates with the appropriate name supplied. **Please refer to page 8 for a complete guide on styles.**

Section Headings

Section headings should be left justified, with the first letter capitalised and numbered consecutively, starting with the Introduction. Sub-section headings should be in capital and lower-case italic letters, numbered 1.1, 1.2, etc., and left justified, with second and subsequent lines indented. You may need to insert a page break to keep a heading with its text.

General Guidelines for the Preparation of Your Text

Avoid hyphenation at the end of a line. Symbols denoting vectors and matrices should be indicated in bold type. Scalar variable names should normally be expressed using italics. Weights and measures should be expressed in SI units. Please title your files in this order: firstauthorname.docx.

Footnotes

Footnotes should be avoided if possible. Necessary footnotes should be denoted in the text by consecutive superscript letters. The footnotes should be typed single-spaced and in smaller type sizes (8pt) at the foot of the page in which they are mentioned and separated from the main text by a short line extending at the foot of the column. The 'footnote' style is available in this template for the footnote text.

Construction of References

References should be listed at the end of the paper, arranged alphabetically first, and then further sorted chronologically if necessary. More than one reference from the same author(s) in the same year must be identified by the letters "a", "b", "c", etc., placed after the year of publication.

https://doi.org/10.24191/jmeche

©Authors, 2025

The ' References ' section at the end of this template provides some examples of how your references should be listed, allowing you to assemble your reference list according to the correct format and font size.

Referencing and Citation Style

The manuscript's references and citations should be written using the APA 7th edition style. Regarding the in-text citation style, APA uses the author's last name and the year of publication, for example: (Field, 2005); (Field & Thomas, 2014). If there are three or more authors, cite only the surname of the first author followed by "et al." and the year., for example: (Field et al., 2017). For direct quotations, include the page number, for example (Field, 2005, p. 14).

A sample of references is available on page 5. Please refer to the following website for further details on APA 7th edition referencing style: https://libraryguides.vu.edu.au/apa-referencing

Author artwork

All figures should be numbered with Arabic numerals (1,2,...n). All photographs, schemas, graphs and diagrams are referred to as figures. Line drawings should be good-quality scans or true electronic output. Low-quality scans are not acceptable. Figures must be embedded into the text, and all images should meet the minimum requirement of 500 x 500 pixels. Lettering and symbols should be clearly defined in the caption or in a legend provided as part of the figure. Figures should be placed at the top or bottom of a page wherever possible, as close as possible to the first reference to them in the paper.

Diagrams

Diagrams can be frameworks, process flows, charts, or any visual aids meant to support written text. Diagrams built using Microsoft Word or Microsoft PowerPoint's Smart Art Graphic Tool need to be embedded as editable or vector-based objects (instead of image objects). Diagrams attached using bitmap-based images (jpeg, png, and other formats) need to be high resolution (at least 300 pixels per inch).

Texts embedded in diagrams

The font used for labels or indicators inside the diagram needs to be formatted as Times New Roman with a font size set at 9. It must not be bold, italicised or underlined.

Fig. 2. (left) This framework is a non-editable diagram, appears blurry and, hence, is unacceptable;
(right) this framework is built using MS Word illustration tools, has higher resolution and is acceptable.
(Font = 9; Click 'Caption B' on the Styles Gallery)

Source:

Please use the 'drawing canvas tool' in MS Word before inserting any images or diagrams into the document. When constructing a conceptual/theoretical framework, please use editable or vector-based diagrams. Draw diagrams using MS Word's Smart Art Graphic Tool (textboxes, labels, arrows, legends, etc.) rather than embedding non-editable image objects. Ensure that all the figures have a good resolution (minimum 300 dpi) and are not fuzzy or blurry.

Captions

The figure number and caption should be typed below the illustration in 9pt and left-justified. The artwork has no text along the side of it in the main body of the text. However, if two images fit next to each other, they may be placed next to each other to save space (see Fig 1). They must be numbered consecutively, all figures and tables, respectively.

Tables

All tables should be numbered with Arabic numerals. Headings should be placed above tables, left justified. Leave one line space between the heading and the table. Only horizontal lines should be used within a table to distinguish the column headings from the body of the table and immediately above and below the table. Tables must be embedded into the text and not supplied separately. Below is an example that the authors may find helpful.

Table 1. An example of a table (Font = 8; Click 'Caption A' on the Styles Gallery)

An example of a column heading	Column A (*t*)	Column B (*T*)
And an entry	1	2
And another entry	3	4
And another entry	5	6

Equations and formulas

Equations and formulae should be typed and numbered consecutively with Arabic numerals in parentheses on the right-hand side of the page (if referred to explicitly in the text). They should also be separated from the surrounding text by one space. If you choose to use the Equation Editor, please ensure that the manuscript is saved using .docx format (rather than .doc) and that Compatibility Mode is turned off.

$$R_t = K_{EP} = 93.02\ (\pm 9.62) - 13.45 \tag{1}$$

Acknowledgements/ funding

This section is compulsory. The following is an example of an acknowledgement statement:

The authors would like to acknowledge the support of the College of Engineering, Universiti Teknologi MARA, Shah Alam, Selangor, Malaysia, for providing the facilities and financial support for this research.

Conflict of interest statement

This section is compulsory. The following is an example of a conflict-of-interest statement:

The authors agree that this research was conducted in the absence of any self-benefits, commercial or financial conflicts and declare the absence of conflicting interests with the funders.

Authors' contributions

Each author's contribution must be stated clearly, reflecting each contribution to the body of the work and manuscript. Authors can refer to CRediT (Contribution Roles Taxonomy) for detailed information about individual contributions to the work. For example:

This journal requires that all authors take public responsibility for the content of the work submitted for review. The contributions of all authors must be described in the following manner:

The authors confirm their contribution to the paper as follows: **study conception and design**: Author X, Author Y; **data collection**: Author Y; **analysis and interpretation of results**: Author X, Author Y, Author Z; **draft manuscript preparation**: Author Y, Author Z. All authors reviewed the results and approved the final version of the manuscript.

An author's name can appear multiple times, and each author's name must appear at least once. For single authors, use the following wording:

The author confirms sole responsibility for the following: study conception and design, data collection, analysis and interpretation of results, and manuscript preparation.

appendix

Authors, including an appendix section, should do so after the References section. Multiple appendices should all have headings in the style used above. They will automatically be ordered A, B, C etc.

A. Example of a heading within an appendix

A.1. Example of a sub-heading within an appendix

There is also the option to include a subheading within the Appendix if you wish.
