

Name: _____ Period: _____

Population Pyramids

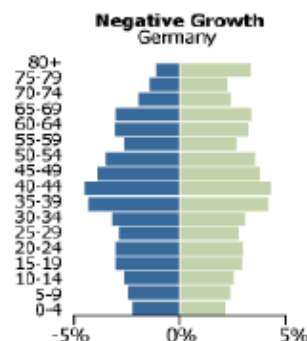

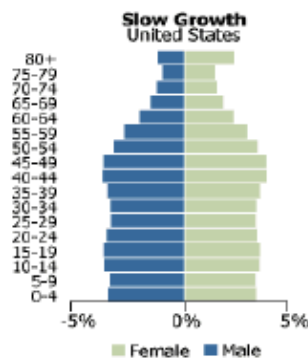

Instructions for Part 1: Use the chart on the left to answer the questions on the right.

Part 1:

1. What is the title of the graph?
2. What country is this graph focusing on?
3. What information is the "y-axis" trying to tell you?
4. What information is the "x-axis" (or the horizontal axis) trying to tell you?
5. Which side of the graph shows the males?
6. Which side of the graph shows the females?
7. Are there more elderly people (65 years old and older) or more young people (0-19 years) living in the Congo? How can you tell?

7. After considering all of these questions, why would the title for this graph "Rapid growth" be an appropriate way to describe the population of the Congo?

Part 2: Using the above graphs for the United States and Germany, answer the following questions:

1. Looking at the age groups in the U.S. graph, why do you think the United States is experiencing "Slow Growth"? Use the graph to explain.
2. Looking at the age groups in the Germany graph, why do you think Germany is experiencing "negative growth"? Use the graph to explain.

4. What information is the “x-axis” (or the horizontal axis) trying to tell you?

5. Which side of the graph shows the males?

6. Which side of the graph shows the females?

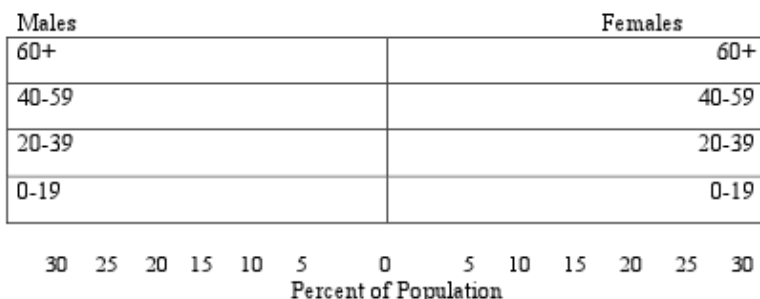

Graphing a Population Pyramid

Instructions: Use the statistics below to color in the Population Pyramid graphs.

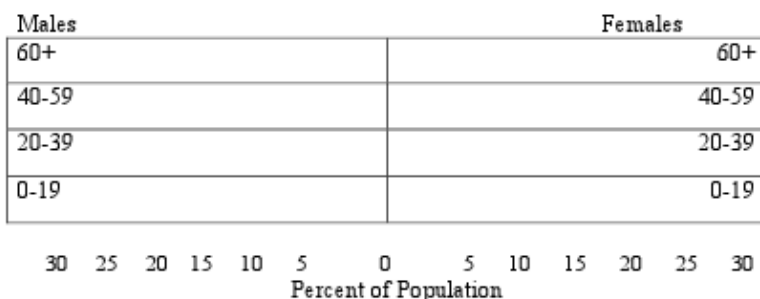

Statistics:

	Males				Females			
	0-19	20-39	40-59	60+	0-19	20-39	40-59	60+
Haiti	27	14	6	2	26	15	7	3
Cuba	14	18	12	4	14	18	12	7
Mexico	22	16	8	3	21	17	8	4

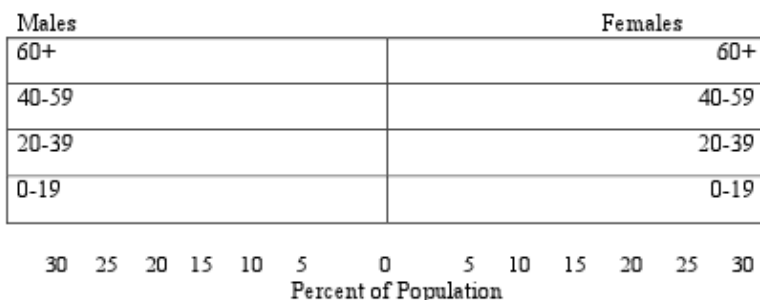

Population Pyramid: **Haiti**

Population Pyramid: **Cuba**

Population Pyramid: **Mexico**

Part III. Answer the following questions using the population pyramids for Haiti, Cuba and Mexico.

1. Which country of these three has the youngest population?

2. Is Mexico's population increasing, decreasing or staying the same? How do you know?

3. Which country of these three has the most "steady" population growth? How do you know?

3. How do you think the Haiti Earthquake will affect Haiti's future population pyramid?

color in the Population Pyramid graphs.

Statistics:	Males	Females	0--19	20--39	40--59	60+	0--19	20--39	40--59								
60+ Haiti	27	14	6	2	26	15	7	3	Cuba	14	18	12	4	14	18	12	7
Mexico	22	16	8	3	21	17	8	4									

Population Pyramid: Haiti

Males Females 60+ 60+

40-59 40-59

20-39 20-39

0-19 0-19

30 25 20 15 10 5 0 5 10 15 20 25 30 Percent of Population

Population Pyramid: Cuba

Males Females 60+ 60+

40-59 40-59

20-39 20-39

0-19 0-19

30 25 20 15 10 5 0 5 10 15 20 25 30 Percent of Population

Population Pyramid: Mexico

Males Females 60+ 60+

40-59 40-59

20-39 20-39

0-19 0-19

30 25 20 15 10 5 0 5 10 15 20 25 30 Percent of Population

Part III. Answer the following questions using the population pyramids for Haiti, Cuba and Mexico.

1. Which country of these three has the youngest population?
2. Is Mexico's population increasing, decreasing or staying the same? How do you know?
3. Which country of these three has the most "steady" population growth? How do you know?
3. How do you think the Haiti Earthquake will affect Haiti's future population pyramid?
