[doctor office ambience] Thank you so much for participating in our study. We needed more volunteers. Most people who signed up for it flaked once they found out it would be a machine that is getting them off and not some nurse from their fantasies. I understand why that would be a deal breaker for people but for professional reasons, I will not be able to touch you more than what is needed. I do need to go over the procedure one more time with you before any touching happens. Informed consent and all that. If you are going to revoke consent for this trial now would be the best time to because once the machine is turned on, it is hard to stop and not recommended that we do. But if problems arise, you feel unsafe, you change your mind, you are allowed to tell me to stop and get you out. I will do my best in that situation. The study you are participating in is number 371, correct?

…Wonderful. Study 371 is a sexual study that is based around body physiology, arousal, and orgasm depending on different individuals from different backgrounds. Of course your identity will remain anonymous and in the write up for this study you will be referred to as volunteer or by the number 9. I am the only one who will know your name and face but to everyone else you will just be a bunch of numbers and readings. The tool in my hand will be placed against your genitals and turned on. A warm vibrating sensation will be felt when I turn it on. It should feel good and help you achieve orgasm quickly. Like I said, the goal of this study is based around levels of arousal and orgasm. The entire time I will be here talking to you, walking you through it. While the machine is attached to your genitals, it will be taking readings of your heart rate, oxygen levels, etc. Once you cum, I'll detach you from the machine and you will be allowed to go home. If you want, I can give you the results when we get them back in a few days if you are curious or you can never think about it again. Which one would you prefer?

…Sounds good. **[typing on keyboard]** I do have one final question for you. Because of the nature of this study, we have found that some people prefer to have the nurse assigned them stay in the room. I can keep you company, be silent, I can watch or not watch, I can dirty talk to help you achieve orgasm faster, things like that that help our volunteers climax easier. Others have the nurse leave the room and want to watch porn or read a dirty story or retreat into a fantasy. Which one would you like?…Me in the room? I can do that, no problem. **[typing]** That is all the information I have. Do you wish to revoke consent and your participation in the study or should I proceed and get this thing attached to you?

[footsteps] Wonderful. Please open your robe for me. **[fabric]** Very good. I'm going to take the head of this, for lack of a better word vibrator, and place it right between your thighs against your sex. From there, there are two straps that will attach to either side of your legs and keep it in place. **[fabric noises]** If you need to touch yourself to help you achieve climax, that is perfectly okay. I've had some clients that need to play with their nipples, have a hand over their mouth and nose, all sorts of stuff. We don't kink shame here. Alrighty, now that the tool is in place I'm going to turn it on. **[button // beep]** Machine is on, readings are starting, everything looks normal right now. Are you reading to begin?

…Perfect. **[vibrating noise starts]** Didn't I tell you it would feel good? A warm vibrating sensation against you. I have it on the lowest setting to start you out with. Since we are studying arousal, it is my job to make sure you experience every part of it. There's no reason to feel awkward with me, sweetheart. I do this multiple times a day with all types of people. There isn't any noise you could make, kink you could have, or request of me that I haven't heard. You are allowed to relax while the machine takes you reading and your orgasm starts to build. The buds of arousal begin to bloom as it pulses away. I'm sure having a pretty nurse in the room watching you helps as well. Going to put on a good show for me?

You are looking at me like that was an unprofessional statement on my behalf. Considering the nature of my work, it's not. Lots of people are exhibitionists, are you one of them?…You've never been with your partner and they asked to watch you touch yourself? You've never gotten on cam with someone long distance and masturbated together? Surely you've masturbated with the window open while you try to keep quiet. There is a bit of thrill having a total stranger watching you get off. There is something dirty about getting off and trying not to get caught. It makes the whole act feel taboo like you shouldn't be doing it which only makes it hotter. **[chuckle]** Your heart rate is increasing at a good rate. It's not going too fast or too slow. Just a steady increase. That is what we want to see. You are reacting to my presence well. I was concerned you were going to want me in the room only to ask me to leave. I would have been disappointed if you were. I wanted to see what you look like when you orgasm. It's not common that I get to have a study participant that is just my type. If it wasn't unprofessional or invalidate the research this program is doing, I would ask you out to drinks afterwards. **[sigh]** Doing very good for me. The machine feels so wonderful against you, vibrating away. A steady warmth growing from between your legs as you meet my gaze. You are so good for me, sweetheart.

Mmmm, you like that? You like being good for me? You like when I praise you?…It feels so good having all my attention on you, doesn't it? Your hips are starting to move. Your thighs are shaking a bit as your hands clench and unclench. You are starting to feel warmer and you aren't sure if it is because of the machine pulsing away between your thighs helping you reach climax or if it is because being watched and praised by such an attractive nurse is making you fluster. My eyes darkening with arousal as I watch you slowly fall apart. You don't normally do stuff like this, do you? You don't seem like the type. You seem like you try your best to be on your best behavior, follow all the rules, participating in a study such as this is out of the norm for you. It adds to the thrill. Would this be your first time orgasming in a public place like this?

…Isn't that adorable? Your first time cumming in public and I'm going to get to watch. How lucky am I? Not only do I get to be the one who makes you cum but I get to be the cause of your first public orgasm. You're never going to forget me. I wouldn't even be shocked if this goes into your fantasies. I want you to masturbate to me tonight. Pretend I'm the one holding the vibrator against you, looking up at you from between your thighs, biting my lip and telling you how hot you are. You are being so good for me sweetheart. You are making me so proud by allowing the machine to get all it's readings as you get closer to cumming. Your oxygen levels have increased, blood pressure rising, heart rate still slowly increasing, everything is right on track for a proper orgasm. I just love how you look right now. The arousal painting across your face is getting me wet, as unprofessional as that is to say. It's your fault for being my type and being so well behaved for me.

I can admit that you being so good for me turns me on. I've always had a thing for the quiet ones. They usually like to be bossed around in the bedroom and I've always been a bit bossy. I like things done my way and that's the only way. You like to be told what to do, don't you?…You look like the type. It's so much better to be told what to do. There is no guessing what I want, there is no wondering if you are doing something correctly because I told you what to do and how to do it. All you have to do is be a good puppy and follow the orders given, isn't that right, sweetheart?…Aww, you are even eager to please like one. **[chuckle]** I bet that vibrator is starting to feel really good. The readings that are being taken are increasing exponentially now. I bet it won't be long until I get to see what it looks like when you are cumming. I bet you are just as cute as when you are trying to not give away how much you are enjoying this. I can tell, sweetheart. You might be trying to not show me how good it feels but the readings don't lie. I always know when it feels good.

[chuckle] Look at you, being so good for me. You are so sweet, aren't you? I am struggling to keep the boundary between us because I just want to feel you. I shouldn't though. It would invalidate the study as the machine between your legs that is pulsing away is the only thing that is supposed to be getting you off. Me touching you, me getting close, me whispering in your ear, my lips ghosting over your lips, it would invalidate the integrity of this study. I'll just have to settle on enjoying the show. Watching your little performance. So fucking sexy. I want you so badly, sweetheart. The vibrator might feel good but I know I feel better. Are you picturing it? In the fantasy, are you being an obedient puppy? Having your head pet as you worship my wet pussy, the juices dripping down your chin as you are praised. I bet you love the taste of pussy, don't you sweetheart?

…I pegged you right. **[chuckle]** That's it, puppy. You are getting close, aren't you? The readings on the machine say you are getting close to your climax. The slow increases are picking up. Being so good for me, making me so fucking proud. You are the best participant in this study I've had so far. The perfect volunteer, sweetheart. You want to keep making me happy, don't you?…Of course you do. A good little two shoes like yourself only wants compliments and praise. To have all my attention on you, watching you, as you are so close to cumming. You can feel it. Your body is almost ready to tip over and cum for me. All you have to do is let it. You don't have to wait for my permission. You've earned it, puppy. You deserve to orgasm. You deserve to cum for me. You've been so good. You've made me so proud. The only way you could make it better for yourself is by cumming for me. It's the grand finale that this little show you are putting on for me deserves. I want to see it. Show me what you look like when you orgasm, sweetheart. You are already so hot, you can only get hotter. Look so fucking good like this. Love the tiny noises that are escaping your lips as you pretend you aren't enjoying this as much as you are. Trying your hardest to keep some type of composure despite the odds not being in your favor. Your body wants to release. It wants to cum for me. Don't fight it, sweetheart. Make me proud. Cum for me. Orgasm all over the vibrator like a good little puppy. Awww, so good. So perfect. That's it. Just like that. **[typing]** Readings have plateaued. Good, good. Let me check, right, right. The levels are starting to return to normal. Oxygen levels are returning to normal, blood pressure is decreasing, everything is looking perfect. You have given me some of the best results, sweetheart. How are you feeling?

…**[chuckle]** That's fair. I apologize for my lack of professionalism. I am normally better at holding back but I meant what I said earlier. About you being my type. I wasn't expecting to have a volunteer who I found so attractive. I got caught up in the act and found myself not only getting turned on but wanting you to cum. More than for just the study but for my own selfish purposes. Please accept my apology…Thank you. Now let's get this machine off on you and you are free to go! **[footsteps // fade out]**

~ Inclusivity Stuff ~
Pet Names: Sweetheart and puppy
Body Parts Mentioned: genitals, sex, legs, hips, thighs, and hands
Included: Patient x Nurse, study participation, SFX, vibrator, exhibitionism, praise, compliments, medical jargon, goody two-shoes listener, listener discovers they are a sub who likes to be praised by hot nurses, listener orgasm, and improper medical practices
