

<p>What animals do we find in the cnidarians group?</p> <p>Jellyfish and anemones</p>	<p>What are the main 6 groups of invertebrate animals?</p> <p>Sponges, cnidarians, echinoderms, arthropods, molluscs and worms</p>	<p>Name the main features of sponges</p> <p>They are aquatic, they are attached to rocks and they can't move, they can live very long years, they filter the water to get nutrients</p>
<p>Name the main features of cnidarians</p> <p>They are aquatic; some can swim and some can't move; they have poisonous tentacles.</p>	<p>Name the main features of echinoderms</p> <p>They are aquatic, they move slowly, they have exoskeleton with spines.</p>	<p>Name the main features of arthropods</p> <p>They are terrestrial, they have jointed legs, they have segmented bodies, all can walk and some can fly or jump.</p>
<p>Name the main features of molluscs</p> <p>Most are aquatic and some terrestrial; some can't move and others move slowly; they have soft bodies and some have shells.</p>	<p>Name the main features of worms</p> <p>They are aquatic or terrestrial; they slither; they have soft bodies; many of them are parasites.</p>	<p>What do jellyfish and anemones have in common?</p> <p>They are aquatic and cnidarians. They have poisonous tentacles.</p>
<p>Name 5 molluscs you know</p> <p>Snail, slug, mussels, octopus, sepia, squid, clam...</p>	<p>Name the 4 groups we find in the arthropods</p> <p>Insects, arachnids, crustaceans and myriapods</p>	<p>What are the differences among the different arthropod groups?</p> <p>Insects have 6 legs, arachnids have 8 legs, crustaceans have 10 legs and myriapods have more than 10 legs.</p>
<p>Name 6 insects you know</p> <p>Dragonfly, ladybug, mosquito, fly, bee, wasp, butterfly, moth, flea...</p>	<p>Name 4 arachnids you know</p> <p>Spider, scorpion, tick, tarantula...</p>	<p>Name 4 crustaceans you know</p> <p>Shrimp, prawn, lobster, crab, river crab, hermit crab, barnacle...</p>
<p>What invertebrate animal group can have a shell?</p> <p>The molluscs can have a shell</p>	<p>What kind of invertebrates animals have jointed legs?</p> <p>Arthropods have jointed legs</p>	<p>What animals are attached to the rocks?</p> <p>Sponges, anemones and some molluscs</p>
